**WORDS AND PICTURES**

One picture is worth a thousand words, is supposed to be the text of an old Chinese proverb that has been the background for the success of several picture magazines, led by Life. Since the advent of European war, Life has changed from pictures to words in an effort perhaps to cover the many activities of war, economic, battle, airplanes and on the sea.

One picture may be worth a thousand words in description of a beauty contest or a landscape. When one goes to describing most other things the words begin to be worth more. One can say a man is fat in two words and everybody knows what he looks like except for the distressing details. It takes a picture at least two by three inches to express the same thought.

As long as one remains in the realm of the physical the pictures do pretty well, but it is very difficult to give the content and ramifications of a parliament speech in a couple of pictures. When Chamberlain says that England will fight to the end to down Hitler or Roosevelt begs for his idea of neutrality, it is a bit hard to put the idea into a picture.

So, for general all around every day use, give us the words, which doesn't mean, either, that a few photographs of a beauty contest will be filed away without a second look.

Has some Oregon coach finally found a method of hopping his players through adverse statements about them in the California press? It's a wonder no one ever thought of it before.

Anyway it did look like rain for a day or two.

**PEACE TALK**

Newspapers carry the information that there is a likelihood that the United States will be asked to join with six other nations in a peace parley some place in Europe in an attempt to settle the very badly roiled waters of European peace.

It seems a futile thing for us to do having no interest in the fight except that we are all residents on the same sphere. Furthermore, if we keep sticking our neck out we are sure to have some bruised places on it without compensating advantages derived therefrom.

There are few in this country who do not heartily hope that Hitler and Hitlerism is decisively defeated in this war; hardly an American who would not be willing to fight to help eradicate such oppressive theories from the earth. Yet it is Germany's business who it has for a ruler and if the people there are so ready to bow to that form of government it is not ours to object. They may not like our form of government, either.

There was a different kind of government in Germany for a few years, a sort of a republican government. It was destroyed by the nations now trying to abolish Hitler.

No representative of this country would dare return home from a peace conference in which Poland was officially dismembered. If that is not to be permitted, why have a peace conference unless it is an attempt to involve us in quarrels where we do not belong.

**NEUTRALITY BILL**

Whether or not the neutrality bill is passed, it must be amended to permit it to be something of a proper document for the people of a democratic country to put on its statute books. As it came from the committee on foreign relations in the senate it would give the president powers never dreamed of by the constitution makers and would serve no other purpose, effectively.

Everyone realizes that in time of war the commander in chief of the army and navy must have considerable power to speed up preparations for war. This bill, however, has to do with neutrality—with keeping out of war. Certainly it is not the intention of American citizens to give authority over so much of national life as this bill, as written, would give.

This administration has gone far enough with laws that give away the people's right to self government. Laws that read, "the president shall have power to—", "the secretary may," etc., are not fitting in a nation that boasts of its democracy. Perhaps such laws would sound very liberal in Russia or Germany where citizens expect to be told what to do. Not so here, where Americans expect to tell their leaders what to do.

**NOT LISTENING**

According to announcements one German, named A. Hitler, is to make a speech in Berlin which will be broadcast on the Pacific coast at 3 a. m. Friday morning. With out disrespect for Mr. Hitler—there are better ways of showing it—we do not expect to be up and about, wrapped in a blanket, with ear glued to the loud speaker at 3 a. m. to hear a speech. We wouldn't get up at 3 a. m. even to make a speech ourselves and if we did we wouldn't expect anyone to listen.

Time may come, if this tendency toward dictatorship here and abroad continues, when it will be absolutely necessary to save hair and head for all citizens to arise at unearthly hours to listen to speeches. That time is not yet and if it never comes it will be too soon for Americans.

Since when did the world get so coked that men and women would get up in the middle of the night to listen to the ravings of any one man? It looks like we are losing our sense of perspective. Let's sleep.

**Statehouse Gossip**

(Continued from page one)

Martin democrats are not true it was revealed by Commissioner Bean this week. A survey conducted by Bean has revealed that more than 50 percent of the commission's employed personnel are registered Republicans. Of the 29 "Key" positions 62 1/2 per cent are filled by Republicans while only 32 1/2 per cent are held by Democrats most of whom have been with the department for many years. Although denying that politics plays any part in the selection of employees for this department Bean admits that 132 republicans have been appointed to jobs in the department since January 1, 23 of these being placed on the payroll since June 1, when he took over. Recent appointments in the department include that of George E. McGee, former city manager of Hillsboro, to the engineering department to succeed the late Frank T. Angell, and Eugene E. Laird of Myrtle Point, as assistant to the Commissioner's general council.

Oregon was the first state to go over the top in filling its quota for the increase in the national guard. Major General George A. White advised the war department last Friday that all of the 913 recruits allotted to this state had been signed up, just one week after the state quotas were assigned. This record, General White pointed out, repeats that made by this state which was the first to muster its guard organization for services on the Mexican border which served as a prelude for the entrance of this nation into the World War.

**In Other Days**

From the Observer Oct. 5, 1900

Elwood Thompson has just finished his harvest and finds he has 14,500 sacks of wheat of good quality. Sherman county produced 3,000,000 bushels this year.

Judge G. W. Brock has opened a feed and flour store in Moro in the building formerly used as a restaurant.

Wood, next thing to free, \$3.75 cash or \$4.00 on time. J. J. Miller Deschutes.

Taylor Bergin has been wearing a cambrie needle in his hip for three weeks having sat down one left in a chair by his little girl.

The foundations for B. F. Hoover's brick on main street are now ready for the walls.

From the Observer, Oct. 7, 1910

Mr. Fowley made his last trip for the season with fruit and vegetables from his Rufus-Grant farm.

After 40 1/2 day run as matron over the culinary attachment to the Olds threshing machine, Mrs. O. B. Messenger is at home aiding her lord and master in the financial management of the Moro Transportation Co.

Max A. Bull, the republican candidate for sheriff, has sold his farming equipment to A. J. Syron and moved to town.

Manager Rudolf reports a good crowd at the new opera house for the dance Saturday night on account of the hard wood floor. The Moro hotel served midnight supper to forty couples.

Some 1250 head of sheep will be kept within the 14 1/2 miles of fencing ordered by the Moores and Barnums last week.

O. A. Ramsey has just finished the buildings on the experimental farm near town and is moving to the George Hennigan farm.

Grass Valley Journal, Oct. 8, 1920

Gus Engstrom was moving his household goods to town Monday. The funeral of George Clements was held at the Methodist church last Sunday after his accidental death at Bend.

Tuesday the Sherman Electric company crew had holes dug nearby to the Deschutes river west of Erskine.

Ernest Barnett and family left this week for Gilliam county where they will farm.

From the Observer, Oct. 8, 1920

Dr. Poley reports the arrivals in the county of the following new citizens during the current week: Mr. and Mrs. Ben Tomlin a girl; Mr. and Mrs. Robert Belshee a boy; Mr. and Mrs. W. Anderson, near Wasco, a girl.

The office rooms in the Moro Hotel are filling up. One room is now used by L. W. Ross as a jewelry store, another as headquarters for the Sherman Electric company and the Moro barber shop will occupy another.

Harold Payne of Rufus, Glenna Dullinger of Kent, Bernice Neal from Fairview and Don O'Leary from Grass Valley are the four 4-H club children who won trips to the state fair.

The daughter of Lewis Olds at Grass Valley injured her elbow while playing basketball.

**Plaque Commemorates Illinois Citizens**

Florence Gray of Chicago, student of the late Lorado Taft, one of America's most widely known sculptors, has the lasting touch on a plaque commemorating the citizens of Dwight, Ill., to commemorate the sixtieth anniversary of the Kelsey Institute, and pay honor to the three men who founded the organization.

**Hi-Ways to Health**  
 by ADA R. MAYNE  
 OREGON DAIRY COUNCIL

Although a pound of butter is the one leading item on the home makers marketing list, surprisingly few consumers know its food value and the many interesting facts behind the production, handling and distribution of this important food. That's because modern business methods have swept away the familiar family churn of years ago—pushed aside the old-fashioned methods of producing foods right in the home. Not that this is to be regretted because modern methods have also been mother and their families more time for each other and all the happier as a result.

But a meal - to make it satisfactory - should have in it some fat so that it will "stay by." Butter answers this requirement in that it is an excellent food. In addition it has to it an abundance of natural vitamins and is the only food that can boast this fact. It is one of the richest sources of vitamin A which acts as a natural defense against certain infections and builds up resistance to disease. Small amounts of vitamin D are also present. Because of this exceptional high nutritive value plus almost complete digestibility, butter takes its place among economical foods. But it, too, has a distinctive flavor that cannot be imitated and which makes it a desirable spread and seasoning for vegetables as well as in baking.

All butter manufactured in compliance with rigid state and federal laws. These regulations insure pure, clean butter. But consumers are not content to satisfy these requirements. They maintain scientific laboratories to check every step in production carefully and to insure their butter is of the highest quality.

Supply yours! If with vitamins and energy by using butter generally. Here is a new cookie recipe that we know you will like - its better because of the butter used in it.

**Tongue Point Base Interferes With KOAC**

Washington, D. C. Special Oct. 5—Development of Tongue Point on Columbia river as a naval base for patrol planes is blocking increase of power of KOAC, the station of Oregon State college. Navy officers explain that the 542 kilocycles band wanted by KOAC is needed by the naval station at Astoria to contact the squadron of amphibians in operation. Representative James W. Mott, member of the house committee on naval affairs, has been unable to have the navy modify its position.

Mrs. W. F. McLeod and infant son are home from the hospital and Mr. McLeod will be able to come home soon having recovered very well from his infection caused by a burn when the door of the furnace was blown open.

**NEUTRALITY BILL**

Whether or not the neutrality bill is passed, it must be amended to permit it to be something of a proper document for the people of a democratic country to put on its statute books. As it came from the committee on foreign relations in the senate it would give the president powers never dreamed of by the constitution makers and would serve no other purpose, effectively.

**Argentina Pears Compete Here**

Washington, D. C. Special, Oct. 4.—Just as the pear growers of Oregon are confronted with difficulties in exporting their pears to European markets, the Argentina pears are coming into the United States. Duty on pears from Argentina is approximately 24 cents a box. Oregon growers are urging members of the delegation to see what, if anything, can be done about increasing that duty. Importance of the war zone market to American pear producers is shown by the exporting of 3,339,153 boxes and 713 barrels in 1938-1939.

**Strong Verb**

"If you had a little more spunk," a Jefferson teacher said sternly to one of her boys, "you would stand better in your class. Now do you know what spunk is?"

"Yes, ma'am," replied the boy. "It's the past participle of spank."

But a meal - to make it satisfactory - should have in it some fat so that it will "stay by." Butter answers this requirement in that it is an excellent food. In addition it has to it an abundance of natural vitamins and is the only food that can boast this fact. It is one of the richest sources of vitamin A which acts as a natural defense against certain infections and builds up resistance to disease. Small amounts of vitamin D are also present. Because of this exceptional high nutritive value plus almost complete digestibility, butter takes its place among economical foods. But it, too, has a distinctive flavor that cannot be imitated and which makes it a desirable spread and seasoning for vegetables as well as in baking.

All butter manufactured in compliance with rigid state and federal laws. These regulations insure pure, clean butter. But consumers are not content to satisfy these requirements. They maintain scientific laboratories to check every step in production carefully and to insure their butter is of the highest quality.

Supply yours! If with vitamins and energy by using butter generally. Here is a new cookie recipe that we know you will like - its better because of the butter used in it.

**Tongue Point Base Interferes With KOAC**

Washington, D. C. Special Oct. 5—Development of Tongue Point on Columbia river as a naval base for patrol planes is blocking increase of power of KOAC, the station of Oregon State college. Navy officers explain that the 542 kilocycles band wanted by KOAC is needed by the naval station at Astoria to contact the squadron of amphibians in operation. Representative James W. Mott, member of the house committee on naval affairs, has been unable to have the navy modify its position.

Mrs. W. F. McLeod and infant son are home from the hospital and Mr. McLeod will be able to come home soon having recovered very well from his infection caused by a burn when the door of the furnace was blown open.

**NOT LISTENING**

According to announcements one German, named A. Hitler, is to make a speech in Berlin which will be broadcast on the Pacific coast at 3 a. m. Friday morning. With out disrespect for Mr. Hitler—there are better ways of showing it—we do not expect to be up and about, wrapped in a blanket, with ear glued to the loud speaker at 3 a. m. to hear a speech. We wouldn't get up at 3 a. m. even to make a speech ourselves and if we did we wouldn't expect anyone to listen.

Time may come, if this tendency toward dictatorship here and abroad continues, when it will be absolutely necessary to save hair and head for all citizens to arise at unearthly hours to listen to speeches. That time is not yet and if it never comes it will be too soon for Americans.

Since when did the world get so coked that men and women would get up in the middle of the night to listen to the ravings of any one man? It looks like we are losing our sense of perspective. Let's sleep.

**Argentina Pears Compete Here**

Washington, D. C. Special, Oct. 4.—Just as the pear growers of Oregon are confronted with difficulties in exporting their pears to European markets, the Argentina pears are coming into the United States. Duty on pears from Argentina is approximately 24 cents a box. Oregon growers are urging members of the delegation to see what, if anything, can be done about increasing that duty. Importance of the war zone market to American pear producers is shown by the exporting of 3,339,153 boxes and 713 barrels in 1938-1939.

**Strong Verb**

"If you had a little more spunk," a Jefferson teacher said sternly to one of her boys, "you would stand better in your class. Now do you know what spunk is?"

"Yes, ma'am," replied the boy. "It's the past participle of spank."

**IN THE CIRCUIT OF THE STATE OF OREGON FOR SHERMAN COUNTY.**

**SS. SUMMONS**

Roy J. Baker, Plaintiff vs Anna Schwister Hull, and her husband John Doe Hull, and to the unknown heirs of said Anna Schwister Hull and John Doe Hull, or either of them. **Plaque Commemorates Illinois Citizens**

Florence Gray of Chicago, student of the late Lorado Taft, one of America's most widely known sculptors, has the lasting touch on a plaque commemorating the citizens of Dwight, Ill., to commemorate the sixtieth anniversary of the Kelsey Institute, and pay honor to the three men who founded the organization.

**Hi-Ways to Health**  
 by ADA R. MAYNE  
 OREGON DAIRY COUNCIL

Although a pound of butter is the one leading item on the home makers marketing list, surprisingly few consumers know its food value and the many interesting facts behind the production, handling and distribution of this important food. That's because modern business methods have swept away the familiar family churn of years ago—pushed aside the old-fashioned methods of producing foods right in the home. Not that this is to be regretted because modern methods have also been mother and their families more time for each other and all the happier as a result.

But a meal - to make it satisfactory - should have in it some fat so that it will "stay by." Butter answers this requirement in that it is an excellent food. In addition it has to it an abundance of natural vitamins and is the only food that can boast this fact. It is one of the richest sources of vitamin A which acts as a natural defense against certain infections and builds up resistance to disease. Small amounts of vitamin D are also present.
