### Ralph Cake

### Portland Lawyer Would Be Committman

Ralph H. Cake, prominent civic leader of Portland, partyworker and businessman, filed late yesterday with Secretary of State Earl Snell for the office of Republican national committeeman.

Cake, who is a native of Portland where he was born in 1891, absorbed Republican doctrine under the tutoring of his father, the late Judge W. M. Cake, while attending Portland grade and high schools and the University of Oregon where he graduated in 1913. He finished his education by taking law at Harvard, and returned to Oregon to join his father's firm. He is a part president of the University of Oregon Alumni association.

Cake was married in 1916 to Gretchen Sherwood of Coquille, and they have two children, Martha and Ralph Jr.

Since the death of his father Cake has been associated in law practice with Lamar Tooze and Nicholas Jaureguy. He is also president of the Equitable Savings & Loan association. Always active in local politics Cake was chairman of the finance committee for the recent Lincoln day program in Portland which featured Thomas E. Dewey.

### GROWERS ADVISED TO MARK SEED

The suggestion has been sent out by the government that seed growers of eastern Oregon mark their seeds "Eastern Oregon Origin," to distinguish the product from that of western Oregon. This marking will, it is said, have trade significance. Rep. Walter M. Pierce has written growers in his district to begin using the phrase at once.

## HI-WAYS TO HEALTH by ADA R. MAYNE OREGON DAIRY COUNCIL

In scratching around for ideas for Lenten meals don't overlook the possibilities to be found in cottage cheese. A most versatile food is cottage cheese or pot cheese, farmer's cheese, schmeirkase, or call it what you will, and deserves a more prominent place in the family meal plans than it sometimes gets.

For one thing, it supplies the much needed proteins for muscle building and upkeep. Because of this it can be used effectively as a meat substitute. Cottage cheese supplies, too, the mineral calcium and phosphorus needed for strong bones and teeth. It is also high in vitamin content and supplies all the vitamins in the "solids not fat" part of milk, although cream is usually added to cottage cheese.

Cottage cheese may be served just as you buy it or as a sundae with jelly or preserves. Raspberry jam is especially good with cottage cheese. Or it may be added to colorful salads, combined in many healthful deserts. And with all its being a nourishing and versatile food it is also an economical one and better yet—if you are watching your weight—low in calories.

This pineapple cheese cake is really a masterpiece, and the bread pudding is easy to make and is a tasty desert. Pineapple Cheese Cake 2-3 cup graham cracker 1-2 cups creamed cottage cheese

1-3 cup cake flour 3 tablespoons cornstarch 1-4 teaspoon salt 4 eggs, separated 1-2 cup crushed pineapple, drain 1 cup sugar

Butter bottom of a 9 inch spring form pan. Sprinkle 1-2 cup of the cracker crumbs evenly over bottom. Rub cottage cheese thru

fine sieve. Mix with the flour, corn starch, salt and beaten egg yolks. Boil pineapple juice and sugar together until syrup spins a thread (230 deg.) and pour over beaten egg whites, beating constantly. Combine cheese mixture drained pineapple and egg white mixture; when thoroughly blended, pour into the pan. Sprinkle remaining crumbs over top. Bake at 350 deg. for 35 minutes, until cake is firm and a silver knife inserted in center comes out clean. Serve cold. Serves 6 to 8.

### Bread Pudding

2 cups diced bread 1 cup creamed cottage cheese 1-2 cups milk 1-4 cup melted butter 2 eggs, beaten 1 tablespoon lemon juice 1-4 cup sugar 1-4 teaspoon salt 1-4 teaspoon lemon rind

Combine bread with cottage cheese milk and melted butter; add the other ingredients and pour into a buttered casserole.

### Towns' Names Traced

Moro, Oregon, is one of three contemporary American towns of the same name, according to research being made on Oregon geographic names by the Oregon Writer's project of the W.P.A. Moro, Lee county, Arkansas, with a population of 187 and Moro, St. Louis county, Illinois, with a population of 204 are the others.

Grass Valley, Sherman county, has but one name partner in the United States. It is Grass Valley Nevada county, California, with a population of 3817. The local town is said to have been named because of the fertility of the land which produced rye grass so

tall that it reached over a man's head even though he was riding on horseback.

### Wasco Play Tickets Now On Sale

The advance ticket sale promises a well-filled house for the Garden Club play at the Wasco Opera House on Saturday, Mar. 2nd. Their offering this year is a three-act comedy, "It Happened One Night," by Norman Cannon and first produced on Broadway. The laughs follow each other with startling rapidity and every character contributes to the fund of mirth. There is the golf-loving father whose wife loves bridge—played by William Clothier and Lois Hilderbrand. Georgia Bracken will be seen as the daughter June, Robert Belknap as the law student butler in love with her. Then there is Jeffrey, played by Glenn Van Gilder, and Cleone Kirkele and Virginia McIntyre as the maid and the negro cook.

The Girls' Orchestra of Moro will provide an interesting part in the evening's entertainment.

Those who have not secured their tickets yet may do so at the Wasco Pharmacy or from any member of the Wasco Garden Club.

WHY THE NEW WIRE? Illustration of a man looking at a wire being pulled up a pole.

HERE IS THE REASON

### 1. WIRES ARE ONLY SO BIG

"An electric wire, like a water pipe, is limited in capacity. Only so much water can go through a standard 1/2-inch water pipe. If you use more water, you'll need larger pipes. Only a certain number of kilowatts can pass along a No. 4 wire. When the customers' use of electricity develops to the point where the line is loaded to capacity, we must string larger wire, or add another circuit."

### 2. YOU DON'T DRINK MORE WATER

"Your family uses about as much water as it did 25 years ago. Therefore, the managers of city water systems don't have to worry about increasing the size of pipe supplying your home."

### 3. YOU USE MORE ELECTRICITY

"Electricity was used only for lighting 25 years ago. Now homes find new uses every year. Last year 10,800 Pacific Power & Light Company customers cooked electrically. More than 43,350 customers enjoy electric washers. There are more than 20,820 electric refrigerators on PP&L lines, more than 51,600 radios."

### 4. WE ARE ALWAYS BUILDING

"A big expense of a power system, then, is enlarging its facilities to keep up with the increasing demand for electricity. Last year Pacific Power & Light Company spent \$874,000 on normal new construction. This year its construction requirements will exceed \$1,000,000. And so it goes."

"During the past 10 years Pacific Power & Light Company has spent \$20,562,094 for new construction to keep pace with the growing use of electricity in the territory served. In the same period it has made five big rate reductions, which have brought cumulative savings of \$3,493,000 to customers. Today the Company's rates are among the lowest in the U. S."

Why we buy 'Caterpillar' Diesels! TOM WEBSTER, T. S. Webster & Sons, Rexburg, Idaho. 1. With 3500 acres of wheat, we had to have dependable machines to get the work done on time. 2. Each of our three 'Caterpillar' Diesel Tractors pulled a harrower on less than 1 1/2 gals. of fuel an hour. 3. We cut approximately 4 acres an hour with each tractor and all three thrashed as much as 5000 bushels of wheat in a 10-hour run. O'MEARA Supply & Imp. Co. Caterpillar
