## WEED CONTROL EFFEC-TIVE IN KLAMATH

Klamath Falls—A county wide weed control program has been under way here this spring, encouraged by reports from the bureau of reclamation that for the first time a decrease in noxious weed acreage is shown in its records of the Klamath project. The county spray rig has been in daily use spraying roadways, ditch banks and similar areas with diesel oil. In addition, a burning crew was used to wilt certain perennial weeds. Credit for the decrease in perennial weeds in 1939 is given by County Agent Henderson to good summer-fallowing being carried out by growers, as well as effective use of the smother crops, and in some cases, good coverage of drains and ditch banks.
