Loan Feature Assures Price

Regardless of uncertain markets due to troubled world conditions, Oregon farmers who grow wheat and barley will have assured incomes as a result of 1940 federal loan program just announced.

The state AAA office in Corvallis gave as an example a typical Umatilla county farmer who markets his wheat in Pendleton. If he has complied with the AAA farm program, he will be eligible

for a loan of 58.6 cents a bushel on his No. 1 soft white wheat. In addition, he may earn conservation and parity payments totaling 19 cents a bushel on the normal yield of his acreage allotment. If he has an average yield, this means he will have a guaranteed return of approximately 78 cents a bushel for the wheat harvested this year.

Eligible barley growers may borrow 35 cents a bushel for No. 1 grain on the basis of farm storage. Rates will be seven cents less if the barley is stored in warehouses. Interest rate is 3 percent

HI-WAYS TO HEALTH

by ADA R. MAYNE

OREGON DAIRY COUNCIL

Nothing is so thoroughly American as ice cream. As early as 1777 ice cream was on the market in New York. Not long after, when Dolly Madison first served the now famous fresh strawberry ice cream at a White House function, it was safely launched as America's favorite dessert.

Ice cream tastes so good that most people feel they are indulging themselves when they eat it. Actually, ice cream compares favorably in food value to milk. It is made of milk products, and contains all the proteins, vitamins and minerals found in milk. Money spent for ice cream is an investment in health.

As a result of advances made in mechanical refrigeration, you can purchase your favorite ice cream when you do your marketing; pack it in your refrigerator and have it ready to serve whenever you want. Ice cream is good for luncheon, for dinner, for the children home from school, for any occasion for that matter, because everybody likes ice cream.

This new method of keeping ice cream in your refrigerator enables you to have plain ice cream or an attractive special dessert. It is convenient, time saving and economical.

As soon as the ice cream is brought in, set a dry, well chilled ice tray on several thicknesses of newspaper. Transfer ice cream from carton to tray as quickly as possible. Ice cream melted around the edges of the carton may be stirred in quickly, but disturb the ice cream as little as possible. Press down firmly, smooth the surface with spatula, and cover

with wax paper. Place immediately in freezing compartment and reduce the temperature until thoroughly hardened. If refrigerator is efficient, ice cream may be kept from 12 to 24 hours. For a real treat in the way of a combination of cake and ice cream we suggest this Devil's food ice cream loaf.

Devil's Food Ice Cream Loaf

- 1 quart vanilla ice cream
- 1 cup cream whipped
- 2 layers chocolate devil's food

Line a freezing tray with wax paper. Pack half the ice cream into bottom tray; cover with thin layer of cake cut to fit. Pack the rest of ice cream firmly on top. Press another layer of cake firmly onto top; place in freezing compartment for three hours. Turn out onto chilled platter, remove wax paper and pile whipped cream on top. Serve on chilled plates. Serves 8 to 10.

Hunting Season Regulation Set

Regulations for the 1940 hunting season will be formulated next month by the Oregon State Game Commission. The annual hearing on this subject has been set in the Portland offices of the commission, 616 Oregon Building, at 9 a. m. July 13.

Questionnaires have been forwarded to all sportsman's organizations with the request that they be filled out and returned to the commission office as soon as possible.

Perhaps the most controversial subject to be determined by the Commission will be whether the antlerless deer season in the Mudders' Creek district in Grant county will be continued. Open season on antlerless deer was provided in a bill passed by the 1939 legislative assembly and authority was granted to the Commission either to continue or discontinue the season in 1940. No provision was made for providing a limited kill. If the season is left open in this district no change can be made in the present bag limit of one forked horn and one antlerless deer.

Other subjects to be considered include the issuance of special tags for taking of cow elk in the northeastern part of the state; open and closed seasons on Chinese pheasants, quail and grouse as well as trapping regulations on bears.

Heard the Story About the Singing Cash Register?

THERE was once a clerk who felt sorry for one of his very poor customers and accepted a canary as barter for merchandise. The canary became caught in the cash register and every since that fatal day, the cash drawer sings when opened.

The moral of this story is for you to investigate why your cash register has been so silent. It will take more than a canary bird to make it sing... it takes consistent advertising to the public.
