WHAT HOPS DO FOR BEER AND ALE

Hops are for flavor. They give to good beer and ale their lively, appetizing flavor, their pleasant, aromatic tang.

Brewers select and blend their hops with extreme care. In fact, every step in making beer and ale is conducted with masterly skill—to give you better-tasting, more wholesome beverages.

Now the brewing industry wants to do one thing more. It wants to protect your right to drink good beer and ale—by keeping the places where beer and ale are sold wholesome, too.

We want undesirable, anti-social establishments "cleaned-up or closed-up." A plan of action has already been put into effect in a number of states. This plan is being extended. We'd like you to know about it. Send for interesting free booklet.
