Other changes are in the offing. Unless inside reports are incorrect, the boys of the national guard, now in federal service for a year, will not be released after their hitch. Draftees will not be sent back to civil life and instead of selecting older men (26 to 35) the army wants younger men, those

...designed and built by "Caterpillar" are individually replaceable at low cost and are ready for work without adjustment.

from 18 to 25, youngsters who have not started on a career and who have no responsibility. Once trained, draftees are supposed to be held as a reserve for 10 years. A man of 35, after 10 years, is 45 years—too old to make a good soldier. Youngsters of 18 will be 28 in 10 years and still fit after a refresher course.

A potent reason for lowering the

age of draftees is that in the pool from 26 to 35 are experienced mechanics and draft board ordering of these into service is handicapping industry, where they are needed. Another reason: There is a movement from farm to city where industry is paying good wages. Local draft boards are taking the boys who elected to remain on the farm, thereby increas-

ing the shortage of farm labor and increasing the cost of production in the field of agriculture. Sailors are ignoring the sea and taking jobs on riggers in the ship yards, where the pay is better. Furnishing crews for the hundreds of merchant ships now on order is one of the problems worrying the maritime commission.

No. 28 of a Series

### A couple of bad eggs... but why blame the hen?

A bad egg does turn up once in a while... but that's not a sensible reason for destroying all the good eggs... or for taking it out on the hen.

Beer retailing in America is something like that. The vast majority of beer retail establishments are clean, law-abiding, wholesome places. And still there may be a few "bad egg" retailers who violate the law or permit anti-social conditions.

The brewing industry wants these undesirables eliminated entirely... to protect your right to drink good

beer... and our right to make it.

And also to protect the many benefits brought by the beer industry to Oregon... such as the 13,238 jobs created... and beer's \$11,541,550 annual payroll. Beer contributed \$617,020.86 last year in taxes to help pay the cost of government in this state.

You can help us in our program of law enforcement, if you will, by (1) patronizing only the legal and reputable places that sell beer and (2) by reporting any abuses to the proper law enforcement authorities.

BEER... a beverage of moderation
