church building and contains all authorized Christian Science literature which may be read, borrowed or purchased. The public is welcome to all services and to make use of the reading room.

USE IMPROVES MOTOR

Among the reasons why an automobile motor performs better after a few thousand miles of use is the fact that cylinder walls and pistons become glazed or case-hardened from friction if properly lubricated under normal driving conditions, according to the emergency road service department of the Oregon State Motor Association. Fast driving and overheating reduce the chance for these engine parts to become properly glazed.

COUNTY COURT

Continued from page one. The City of Moro makes application to purchase, for the sum of \$50.00, the following described property: All of Lot 5 in Block 5, Original Town, now City of Moro, Oregon.
