Haste Urged On Farmers

Time is the most valuable element in the war effort, declares Robert B. Taylor, Oregon USDA war board chairman, in urging the state's farmers to prepare against war-time shortages during the state's observance of "Plan and Plan for Victory" month, March 9 to 31.

"Tires are short, and so is help, machinery, fertilizer, burlap, and just about every other article that is used on the farm, but time is shortest," Taylor said.

Five things listed that every farmer can do now are:

1. Plan and carry out his farming operations so that his farm will make a maximum contribution to meeting the war food goals set for the county.

2. Make sure that all his farm machinery is in top shape and ready to go.

3. Report a conservative estimate of his seasonal labor needs to the nearest U. S. Employment service office, and make the most efficient use of the available labor supply.

4. Conserve supplies of short materials, such as burlap and baling wire.

5. Be prepared to cooperate with his neighbors in exchanging help, machinery or transportation.

DEPENDABILITY

In these times more than usual it is important to have a dependable grocer-- In wartime prices and quality and even quantities are subject to change.

Quality here will be good, prices will be fair and quantities what is allowed.

Ice cream, the great American dessert, fulfills the qualifications of a good dessert - one selected for both food value and appetite appeal. Ice cream is made of milk and contains all of the ingredients of milk, but in different proportions.

An average serving of vanilla ice cream (1-6 quart or 2-3 cup) furnishes nearly one sixth of the calcium needed by an adult daily and generous amounts of other minerals found in milk. The same high quality proteins of milk are present in important amounts. In addition to being a good food, ice cream is also a comparatively low-calorie one, an average serving of plain vanilla being about one half the caloric value of any of our favorite pies.

[A generation ago ice cream was almost exclusively home made. The newest idea isn't to make your own ice cream but to buy it, remodel it to your choosing and thereby produce very satisfactory and tempting results. From the three of four plain, old stand by flavors the home maker can make her own favorite variations.

trayful on to a cold platter and slice it like a brick.

For even greater convenience in serving, pack the ice cream in paper cups like the ones you use for cup cakes, or into metal molds and store these in the freezing compartment. They may be frosted with melted milk chocolate, or with chopped nuts, or even with whipped cream or case frosting.

Ice Cream Cup DeLuxe

Sprinkle crushed almond macaroons in bottom of paper baking cups. Pack in chocolate ice cream and sprinkle with more macaroon crumbs. Spread sweetened dried apricot puree over the top and finish off with another sprinkling of macaroons. Place cups in freezing compartment to harden. Serve with whipped cream.

Judge wines FIRST for TASTE and BOUQUET

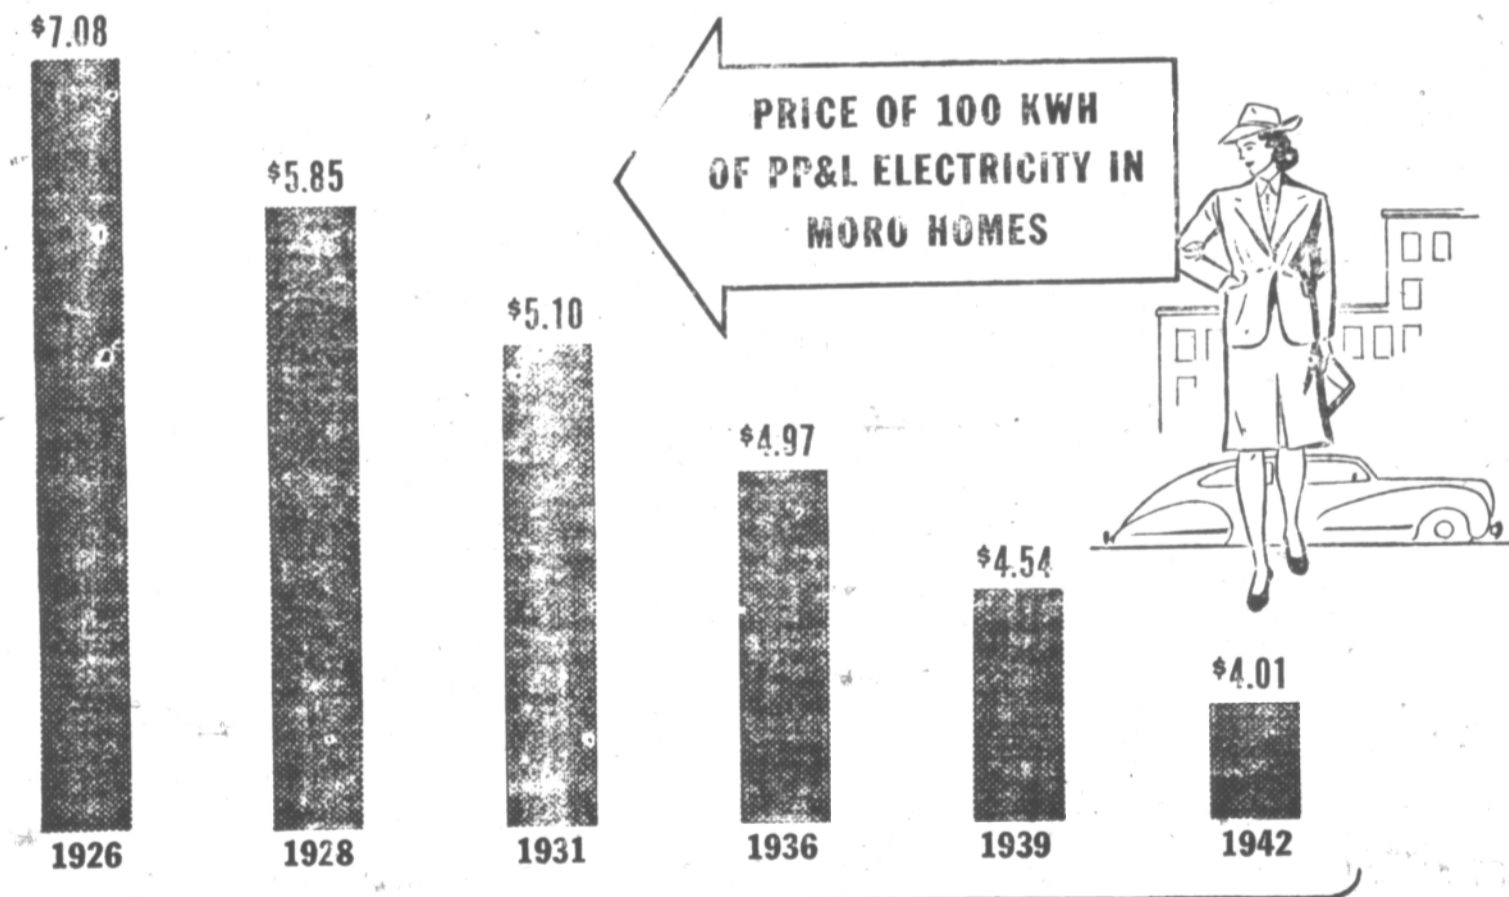

Preferences differ... and tastes differ... Then the simple rule for satisfaction is, "Select the wine you want because it appeals to YOUR taste--because its bouquet or aroma pleases YOU!" Nothing else is as important as the pleasure you derive in "Serving the wine YOU like in the way YOU like."

We've come a long way in Electric Rates, too!

BUSINESS MANAGEMENT made these amazing reductions in your electric rates without any help from the public treasury! Pacific Power & Light has put up all the money for its power plants, transmission lines and substations, and has taken all the risks of pioneering and development.

Instead of receiving a tax subsidy, PP&L has already paid over \$10,000,000 in taxes. This year alone its rapidly increasing tax will exceed \$1,000,000.

You get lower and lower electric rates--government gets more and more tax money. Business management always gives a better bargain!
