We've come a long way in Electric Rates, too!

BUSINESS MANAGEMENT made these amazing reductions in your electric rates without any help from the public treasury! Pacific Power & Light has put up all the money for its power plants, transmission lines and substations, and has taken all the risks of pioneering and development.

Instead of receiving a tax subsidy, PP&L has already paid over \$10,000,000 in taxes. This year alone its rapidly increasing tax bill will exceed \$1,000,000.

You get lower and lower electric rates — government gets more and more tax money. *Business management always gives a better bargain!*
