board reports. The order provides that for the next 90 days, manufacturers may make up to 75 per cent of the average monthly 1941 production of the specified items. After that period, no more iron or steel can be used to manufacture the items named.

Among the iron and steel articles affected by the order, and which farmers will have to do without for the "duration" after present supplies are exhausted are: Cattle stanchions, chicken crates, chick feeders, corn cobs, culverts, feed troughs, fence posts, grain storage bins, silos, dipping and watering tanks, storage tanks, wagon bodies and wheel barrows. Metal roofing and siding also will no longer be available, except for maintenance and repair work, the war board reports.

Oregon's plan to conserve farm machinery through encouraging joint use and ownership of equipment has received national wide recognition, the state USDA war board reports.

We've come a long way in Electric Rates, too!

BUSINESS MANAGEMENT made these amazing reductions in your electric rates without any help from the public treasury! Pacific Power & Light has put up all the money for its power plants, transmission lines and substations, and has taken all the risks of pioneering and development.

Instead of receiving a tax subsidy, PP&L has already paid over \$10,000,000 in taxes. This year alone its rapidly increasing tax bill will exceed \$1,000,000. You get lower and lower electric rates—government gets more and more tax money. *Business management always gives a better bargain!*
