## Stock Feed Must Be Conserved

Obtaining most efficient use of available feed supplies is the No. 1 objective of the 1944 live-stock program set for Oregon, R. B. Taylor, chairman of the Oregon USDA war board, said this week.

Goals call for a reduction of present high numbers of beef cattle and other meat animals, sharp cuts in output of broilers

and hogs, and maintenance of milk and egg production at the highest possible levels.

Increased marketings are recommended to reduce the number of cattle and calves to 87 percent of the present record 1,127,000 head. The program makers believe this represents the number that can be efficiently handled with prospective feed supplies, but recognize that present marketing problems must be solved before the reduction can be effected.

On hogs, the goal calls for 41,000 spring farrowings, down 11 percent, and 20,000 fall farrowings, down 21 percent.

Continuing the trend of the past two years, a further reduction of 10 percent, down to 1,270,000 head, is expected for sheep and lambs.

Yesterday was Sunday, so all the little red corpuscles went to church in a body.

### NATIONAL WAR FUND

Electricity for every use has long been so cheap and abundant here, it's natural not to pay much attention to a lighted lamp or so. But, right now needless light is a "peacetime" luxury.

While there isn't any shortage of electric power... and it isn't being rationed... there is a nationwide shortage of materials that go into all kinds of electrical supplies and equipment. And, every hour you burn a lamp bulb, for example, uses up an hour of its life.

So the Government says: "Conserve"

The government can't allow you, or us, to use vital materials for non-essential jobs. We must get along with what we have already. And the way to do it is to conserve all along the line. It's our job, and yours, to look ahead and use everything we have wisely.

In the end, it's going to mean fewer burned out lamp bulbs, fewer replacements; your electric range, your refrigerator, and other appliances will last years longer. You'll be assuring yourself of continued good service and economy till the time comes when you'll be able to get the marvelous new electrical servants that will be yours after the war.

USE WHAT YOU NEED... BUT NEED WHAT YOU USE!  
The WPB asks everyone to help save by avoiding waste. But don't endanger your eyes, your safety or health. Follow the rule of "Use what you need... but be sure you need what you use."

## THE OLD JUDGE SAYS...

"Just dropped by to tell you, Frank, I had a fine letter from your son, Joe, this morning. Mighty nice of him to take the time to write me... I know how busy they keep the boys. That's a fine camp he's been transferred to up in New England."  
"Yes, Catherine and I had a letter this morning, too. Said he was writing you... he's very fond of you, Judge. Catherine is certainly proud of Joe and proud of the great Army he's a part of."  
"She has good reason to be, Frank."

Joe is one fine fellow and the Army is in the best disciplined, best behaved in our history. Just last night I was reading an article that quoted a report signed by five chaplains in the very camp where Joe is now training. I remember their exact words which were "there is no liquor problem at this Post." And I understand that's true in camp after camp all over the country. And if Catherine would like to see that report, I'll drop it off at the house tomorrow."
