MORE FARM MACHINERY

An improved outlook for new farm machinery in 1944 is foreseen by the War Food Administration. Raw materials authorized by WPB to make planting, tillage and harvesting equipment during the year provide for about twice the quantity produced in 1943, or almost 80 percent of the production in 1940—a year in which manufacture was relatively large. The manufacture of repair parts will be unrestricted.

BROWN POINTS FOR FATS

For every pound of fat a house wife turns in to her meat dealer or other fat salvager, she will receive two brown points, beginning December 13. "But most important," Herbert Faust, director of WPB's salvage division said, "within a month the fat will be transformed into war materials and on the way to the fighting fronts." He reminded housewives to save the grease from turkeys, geese, ducks and chickens for the manufacture of war products.

REDUCE BEAN PRICES

Reductions up to two cents a pound in wholesale and retail prices for dry edible beans will result from a recent OPA action reducing the price spread between country shipper and wholesaler. Country shipping point prices remain the same.
