STAMPS GOOD LONGER

When the new ration token goes into effect on February 27th, food ration stamps will be good for a much longer period than at present. So Mrs America will be able to budget her food points a longer period without having to be crowded by expiration dates. And tokens, which will be given as change for stamps, will be valid indefinitely. Another feature of the ration token plan which will simplify the food rationing program is the fact that all stamps validated after Februtry 27th will be worth the same ten points each. Thus, housewives will have only two denominations of ration currency for both meats and fats and for processed foods, the one point ration tokens and ten point stamps.

EATING is a daily performance, a habit almost universal, praise be. BUYING FOOD is almost so. You need a constant, steady, handy source of supply where the larder can be replenished with good food at good prices. That means——
