YOU COULD LIVE FOR TEN WEEKS ON YOUR FOOD WASTE for one year!

That's a Fact!
An average of 300 pounds of food per person is wasted every year in this country—almost 1/5 of all the food this country produces. This food waste is the worst kind of waste... careless waste... a spoonful on the plate not eaten... leftovers thrown out... a little food gone bad. Morsels that add up to tons are thrown in the garbage can daily—tons of food that could have been used.

Let's start a TOTAL WAR on food waste by conserving food these four simple ways...

- DON'T BUY TOO MUCH...**
especially of food that goes bad!
DO plan meals ahead—by the week if possible. Then buy from day to day—avoid heavy week-end buying.
DO get the vegetables and fruits that are in season and plentiful.
DO keep hands off perishables in the store—don't damage food.
- DON'T LET FOOD SPoil**
DO put meat in the coldest place in the refrigerator.
DO cover leftovers so they won't dry out.
DO be sure to cover dairy products so they won't pick up flavors.
DO clean out the refrigerator often so food won't be forgotten.
DO check all your food supplies frequently.
- DON'T THROW AWAY LEFTOVERS!**
DO make them appetizing—use them up.
DO use the edible outside leaves of cabbage, lettuce, etc.
DO cook carefully—not too long, not too much water for vegetables, slow cooking for meats.
- DON'T FAIL TO EAT THE PLATE CLEAN!**
DO take only what you can eat—eat it ALL!
Encourage the family to follow that rule.
DO eat all the lettuce in the salad, dissolve all the sugar in the cup, get the last drop of soup and bit of gravy, eat the last crumb.

Every scrap you save boosts our wartime food supply!

This statement has been prepared and released by BLITZ-WEINHARD COMPANY with the approval of the War Food Administration.
