THE OLD JUDGE SAYS...

"Did you hear that Tom is going to be inducted into the Army next week, Judge?"
"Yes, Frank told me this morning down at the barber shop. Our town's got a lot of men in the service now, Jim. In fact, all towns have. I was just reading in the paper where there are more than 10,000,000 men away from their homes in the armed forces. And, from all reports, they're doing a grand job bringing victory closer every day."
"We folks at home have a mighty big obligation to those 10,000,000 fighting men. We've got to produce the food to keep them

well fed. We've got to keep them supplied with the ammunition and equipment they need to finish their job. We've got to help the Government pay for all these supplies our men need by buying more and more War Bonds. We'll have another big chance to do that by helping to put the 5th War Loan drive over the top, Jim."
"And, in addition, we must be sure that, while they're away and can't express their opinions, we don't go voting on and deciding any things that will displease them when they come back."

Mr and Mrs William Thornton were here Wednesday from Drain. He is an applicant for the janitorship of the school house, a position he has filled at Drain.

From where I sit... by Joe Marsh

Light Words are 'Grave' Words

There's a poster on the wall of Sam Abernathy's store that doesn't say much. It just shows a cross, with a Yankee helmet on it—and the caption: "Light words are 'grave' words."

It isn't hard to figure out what that sign means. Loose talk has dug a lot of graves... and done a lot of harm here at home, too. And still you hear it.

You hear, for instance, talk about our soldiers drinking and carousing around Army Camps. Of course, when you get the facts—there's not an atom of

truth in it. A U. S. Government survey found our soldiers were the soberest, the best behaved in history—with most of them drinking nothing stronger than a moderate glass of beer.

"From where I sit, that kind of 'loose talk' can do just as much to undermine morale as any rumor that the Axis could invent. And it's up to every one of us to spike that kind of sabotage before it spreads."
