FARM ACCIDENTS VIEWED

Oregon will join other states in stressing farm accident prevention an educational program to make farm people more conscious of the special hazards of agriculture during National Farm Safety week, set by presidential proclamation for July 23 to 29.

W. A. Schoenfeld, dean and director of agriculture at OSC, has been named state chairman for the week by the National Safety Council, which is sponsoring the

program in cooperation with the United States department of agriculture and farm organizations. Dean Schoenfeld will open the week in Oregon with a radio talk over station KOAC Monday, July 24, at 12:45 p. m.

Citing what termed "an appalling" loss of life and limb from farm accidents, President Roosevelt has requested all persons and organizations concerned with agriculture and farm life "to stimulate among farmers a full real-

sation of the need for constant attention to the old familiar precautions against the hazards of their calling and also to awaken in them a sense of responsibility for the proper instruction in rules of safety of the many young and inexperienced persons now being employed on farms."

Buy Bonds for the Fifth War Loan Campaign

A. M. Williams & Company

REMEMBER OREGON'S FARM PRICES OF '33-'34?

Certainly it was a nightmare . . . and wouldn't it have been wonderful to have had a nest egg, absolutely safe, such as today's war bonds, that could be drawn on any time?

We're not predicting another depression, but it's common sense to have a good, safe reserve salted away for a time when you will need it. THERE IS NO SAFER PLACE THAN UNITED STATES WAR BONDS!! They are the world's soundest investment. They're even better than the folding money in your pocket, because even though they are printed on the same kind of paper, they bear interest at a higher rate than most savings accounts.

In 10 Years \$375 becomes 500
750 becomes 1000
3750 becomes 5000

Your money will buy a lot more per dollar after the war than at today's prices. So salt it away in War Bonds.

A bond bought with surplus cash in July '44 might harvest a much needed crop in 1954
