About That Income Tax Statement

Joseph D. Numan, Jr., Commissioner of Internal Revenue, reminds individual income taxpayers that Congress has changed from December 15, 1944, to January 15, 1945, the final date for filing declarations of estimated income tax, either original (as in the case of farmers), or amended, and paying of installments of estimated tax for the Calendar Year 1944.

Among the taxpayers affected by this change in dates are: farmers who exercised their right to defer filing declaration last April 15; others who have really filed 1944 declarations but desire to change their estimates by filing

amended declarations; all persons who owe the final installment of 1944 estimated tax.

If a taxpayer who would otherwise be required to file an original or amended declaration of estimated tax by January 15, 1945, files his annual income tax return for 1944 (on Form 1040) and pays all tax due by January 15, his return will serve as both a return and declaration and he need not file the 1944 declaration.

Also, if a taxpayer files his final 1944 return (on Form 1040) and pays the tax due on it by January 15, he need not pay the

Buying bonds is both a patriotic duty and a most effective means of preventing the hard times that would be due on his estimated tax.

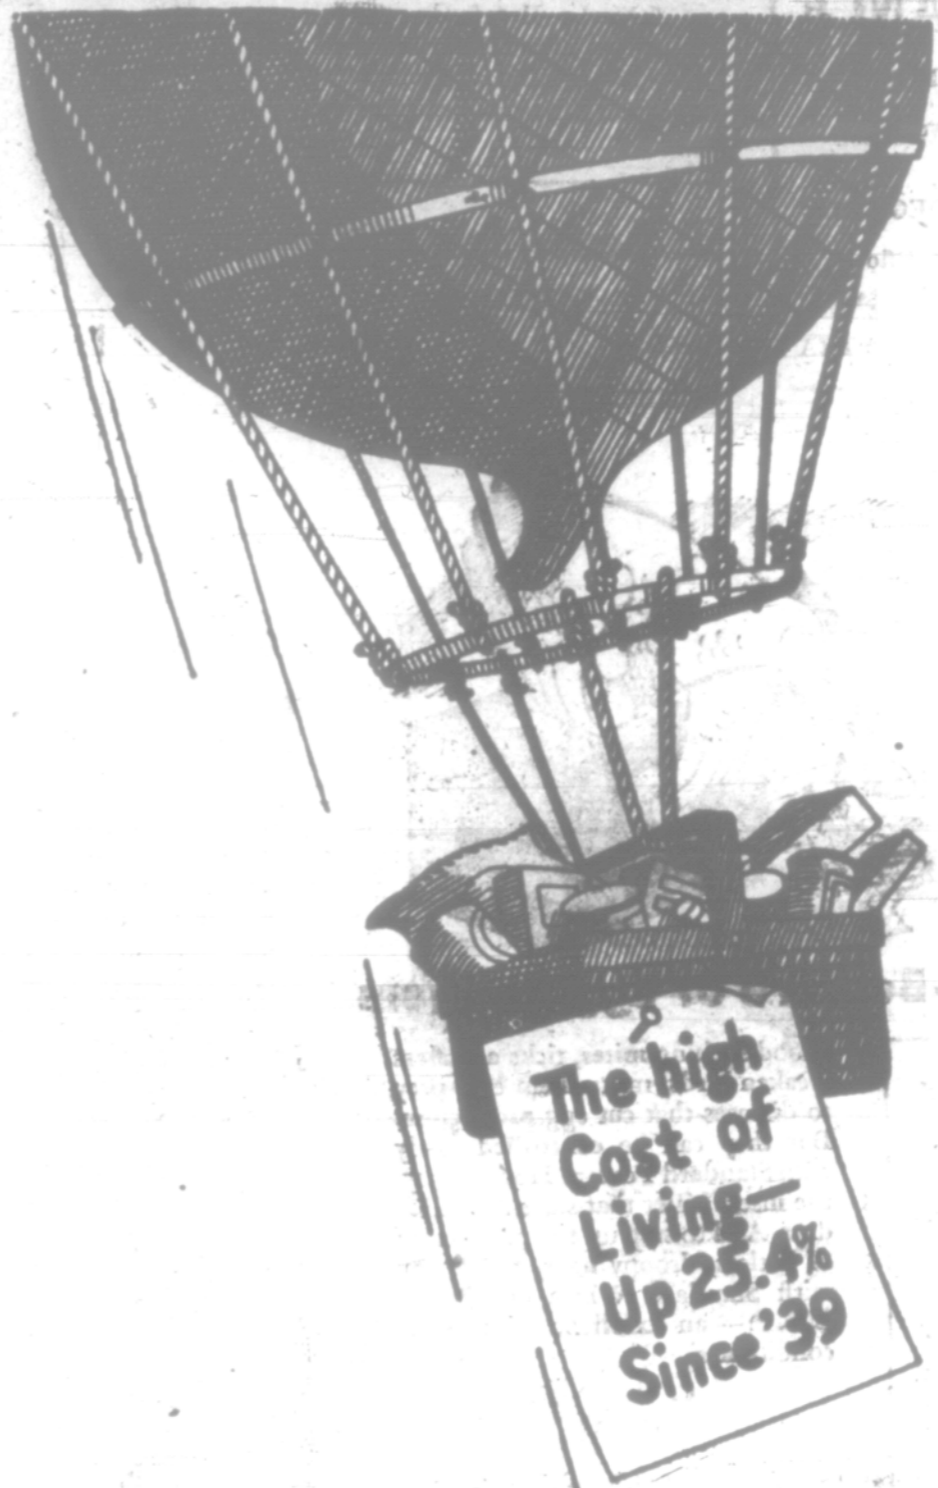

A bill from the Collector for the final installment of 1944 estimated tax may be ignored by a taxpayer who files his annual return (on Form 1040) and pays the tax due on it by January 15.

These changes will enable a taxpayer, if he desires to do so, to wind up all of his 1944 income tax obligations by January 15, but does not affect the filing of his 1945 declaration which will be due March 15. Also, taxpayers who do not file their final 1944 returns and pay the tax due on it by January 15 must do so by March 15.

SEE how they compare! One is up, but the other is down. Since 1939, the cost of living has gone UP 25.4%—while the average price per kilowatt-hour of P.P.&L. electricity is DOWN 21%. Our customers have had three rate reductions and two "rate dividends" in those five years. And the average price we receive for residential electric service is down from 2.36 cents per kilowatt-hour then to only 1.86 cents now. In fact, the average home served by P.P.&L. is using nearly twice as much electricity today as was used fifteen years ago—and at no more cost!
