Withholding Tax Rates Changed For 1945

The revised rates for withholding income tax from wages, provided by the Individual Income Tax Act of 1944, apply to all wages paid by an employer to his employees on and after January 1, 1945, regardless of when the wages are earned, J. W. Maloney, Collector of Internal Revenue, explained today.

Under the new law, for example, any wages earned in December, but not paid to the employee until January 1 or later, are subject to the new withholding rates.

On the average, about the same amount of tax will be withheld under the new rates as was withheld under the old rates. However since the rates were revised to adjust each employee's withholding more closely to his annual in-

come tax, in individual cases the withholding may be either more or less than before. Collector Maloney further explained that the Withholding Receipt, Form W-2 (Rev.), for 1944 to be given by employers to all employees by January 31, 1945, must show all wages actually paid during 1944, together with the amount of income tax withheld during the calendar year.

REHABILITATION

Each week 6,000 soldiers who have completed reconconditioning courses at Army hospitals are being returned to duty, Colonel Luther R. Moore, Ninth Service Command Surgeon, announced today at Fort Douglas, Utah.

Two new uniforms have been developed for Wacs and Army nurses in tropical and cold climates, the Ninth Service Command Quartermaster learned today.

The tropical uniform consists of cotton khaki slacks, matching shirts with convertible collar, and is worn with ankle-high shoes, khaki socks and khaki overseas cap. The cold weather outfit consists of wind-resistant, water-repellant trousers and field jacket. The jacket is olive drab wool-flannel lined with rayon trousers to match. Black felt shoes, knit cap with tiny visor, or the garrison cap and matching knit gloves complete the uniforms.
