

Fire Burns Trailer On Road Near Grass Valley

Fire completely destroyed a trailer and contents of army raincoats of a consolidated freightways truck Saturday evening on the highway four miles south of Grass Valley and just south of the Eakin elevator. When the driver noticed his trailer was on fire he backed the trailer off the side of the road. The strong wind caused the fire to run along the railroad tracks burning some ties and also some new ties along the track and some telegraph poles. The driver was able to save two tires on the trailer and the spare.

Mr and Mrs Ted Trimble had as their guests from Saturday to Monday his parents, Mr and Mrs William Trimble of Gresham and his sister, Mrs Harry McMurray and his brother in law and sister, Mr and Mrs Herbert Suiter of Portland.

USED FAT IS FARMHAND

Veterinary preparations that keep livestock healthy are some more uses of salvaged kitchen fats. Many of the supplies farmers need every day require used fat in their manufacture. Save every drop!

FATS FOR LUBRICANTS

Used fat works here, too! Stearic acid, a used fat by-product, is the chief component of metallic soap that transforms motor oil into the kind of solid lubricant airplanes use. Cooking fat is so urgently needed that War Food Administration is asking housewives to save an additional 100,000,000 pounds in 1945.

PRICE LEVELS ABOVE NORMAL

The United States general level of prices being received by farms is approximately 19 per cent above "parity" with farm wage rates omitted from the formula, according to the weekly review of farm market, price, and outlook information prepared by the Extension service at OSC. The picture is quite different, however, when farm wage rates are considered in addition to commodities farmers buy, taxes, and interest.

The national index shows farm wages 200 per cent higher than the 1935-39 average, while the figures for Oregon indicates 325 per cent above that average. In sharp contrast, the national index of prices paid by farmers for commodities, interest, and taxes is only 35 per cent above the 1935-39 level.

As of July 1, farm wage rates in Oregon and generally throughout the nation were 10 per cent higher than a year ago. The national average increase in the index of prices paid for commodities interest, and taxes was only about 2 per cent over a year ago. The combination of wage rates and other costs practically offsets the average advance of 7 percent above a year ago in the general level of prices by farmers.

At mid-June this year United States average farm prices for some of the farm products produced in Oregon were as follows in relation to "parity" as now calculated: Wheat 98 per cent, oats 98, barley 91, hay 77, potatoes 144, hogs 112, beef cattle 133, veal calves 118, lambs 132, wool 132, milk cows 107, butterfat 120, milk at wholesale 123, turkeys 134, chickens 140, eggs 112, horses 28, alfalfa seed 165, red clover seed 107, alsike clover 121, apples 163.

Apples Can Be Used to Advantage

"An apple a day keeps the doctor away," is a thought to keep in mind while casting your eye over the fruits and vegetables for sale. Apples scalloped with sweet potatoes, fried apples with pork sausage, apple stuffing with low-point sparris, are just a few of the many palatable combinations possible with this versatile fruit. For dessert try applesauce served with

ginger-bread, which, incidentally, front of a fire is a pleasant win-takes less sugar than almost any ter's evening past-time is any-other cake. Munching apples in body's language.

Let Us Send You Samples of this Clean, Family Newspaper THE CHRISTIAN SCIENCE MONITOR

Free from crime and sensational news... Free from political bias... Free from "special interest" control... Free to tell you the truth about world events. Its own world-wide staff of correspondents bring you on-the-spot news and its meaning to you and your family. Each issue filled with unique self-help features to clip and keep.

The association reserves the right to reject any or all bids.

MORO GRAIN GROWERS ASS'N

What else have you got for him... beside those big plans?

There's your son. Proud of him? Sure you are... and you've got big plans for him, too. But plans alone are not enough. A little cash is going to come in mighty handy to a young man starting his career in 1955. Maybe those dollars you put aside now will give him a better start than you had. Maybe they'll help him get the extra training he'll need to be a doctor or a lawyer or an engineer. Surely they'll help him through the first tough time when he's "on his own." He's your son... his future is yours. Back that future with series E War Bonds. And 10 years from now his, "Thanks, Dad," will give you the biggest return you've ever had from any investment.

WAR BONDS... to have and to hold
