**PP&L's NEW LOW ELECTRIC RATES NOW IN EFFECT!**

*Starting with meter readings taken on and after August 22*

**T**HE LARGEST ELECTRIC RATE REDUCTION in Pacific Power & Light Company's history went into effect on August 22. This \$1,000,000 system-wide rate slash now makes your electric service a greater value than ever!

Your taxpaying, business-managed power system has reduced the price of electricity again and again since it started out in business back in 1910. It has cut rates *five times* in the past 9 years alone.

This record of American business progress really means something! It was established by a company that shares your tax burden, pays its own way, and gets no "free ride" at public expense. Low-cost PP&L electricity is today's biggest bargain.

Up in the locomotive cab of your train sits a man you seldom see. Perhaps you never catch a glimpse of him although he is responsible for taking you to your destination.

Union Pacific, like other railroads, has certain exacting requirements for an engineer. The man who pilots a passenger or freight locomotive has served years as a fireman... knows the function of a locomotive's many parts... is thoroughly familiar with operating rules... has passed a rigid physical examination and been periodically re-examined. In short, he is well qualified, both

mentally and physically, to handle his job. Care in selecting and training employees has been a big factor in establishing the enviable Union Pacific record for safe and dependable transportation over the Strategic Middle Route, uniting the East with the mid-West and the Pacific Coast.

Another "man you seldom see" is many miles away, doing his part to speed total victory. Let's bring him home—and quickly. You can help by buying bonds—saving them—and then buying more.
