WANTED Sherman County Farmers who want to take the gamble out of 1946 wheat

To date applications for Federal All-Risk Crop Insurance on 1946 winter wheat have been signed for 42 Sherman County farms. Insurance will not be effective in the county unless at least 50 farms are covered. This is in accordance with Congressional stipulation.

Why Risk Your Capital?

Two types of coverage are offered. 50 or 75 percent of your approximate average yield. You can protect the profits you have made during the last few years of good yields and fair prices by assuring yourself of getting back cost of production on future crops.

Here's The Way It Works

50 percent Insurance on Sample Farm

Acres	Yield bus.	Production Covered	Premium Rate per Acre	Total Cost
300	20	3000	.4 bu.	\$1.20
		\$4110.00	.55 c	\$164.40

Wheat at \$1.37 per bu.

All Hazards Are Covered

You know you would be able to continue operating if you could be sure of a minimum return of from \$10.00 to \$15.00 per acre on your wheat acreage. With 50 percent coverage on Crop Insurance you can be assured of such returns, in spite of any thing that might happen to your crop except your own neglect. Such protection will only cost you 24 pounds of wheat per acre as premium.

Can You Afford To Be Without It?

September 29th Is The Last Day

The Cost Is Reasonable Premium rates for Sherman County farms are .4 of a bushel for 50 percent coverage and 1.2 for 75 percent coverage. County AAA office.
