About feet and what to do with them

Does your wife have any shoes without holes in the toes? We have some. Not new, but neat; not classy, but comfortable; not the kind you'd wear to your wedding, but good for fine foot feeling everyday.

If you like your feet better than fashion give these the benefit of your glance.

Then there's the matter of overshoes and rubbers. We have some of them too, the good substantial kind that will keep Johnny's feet dry and help prevent the flu.

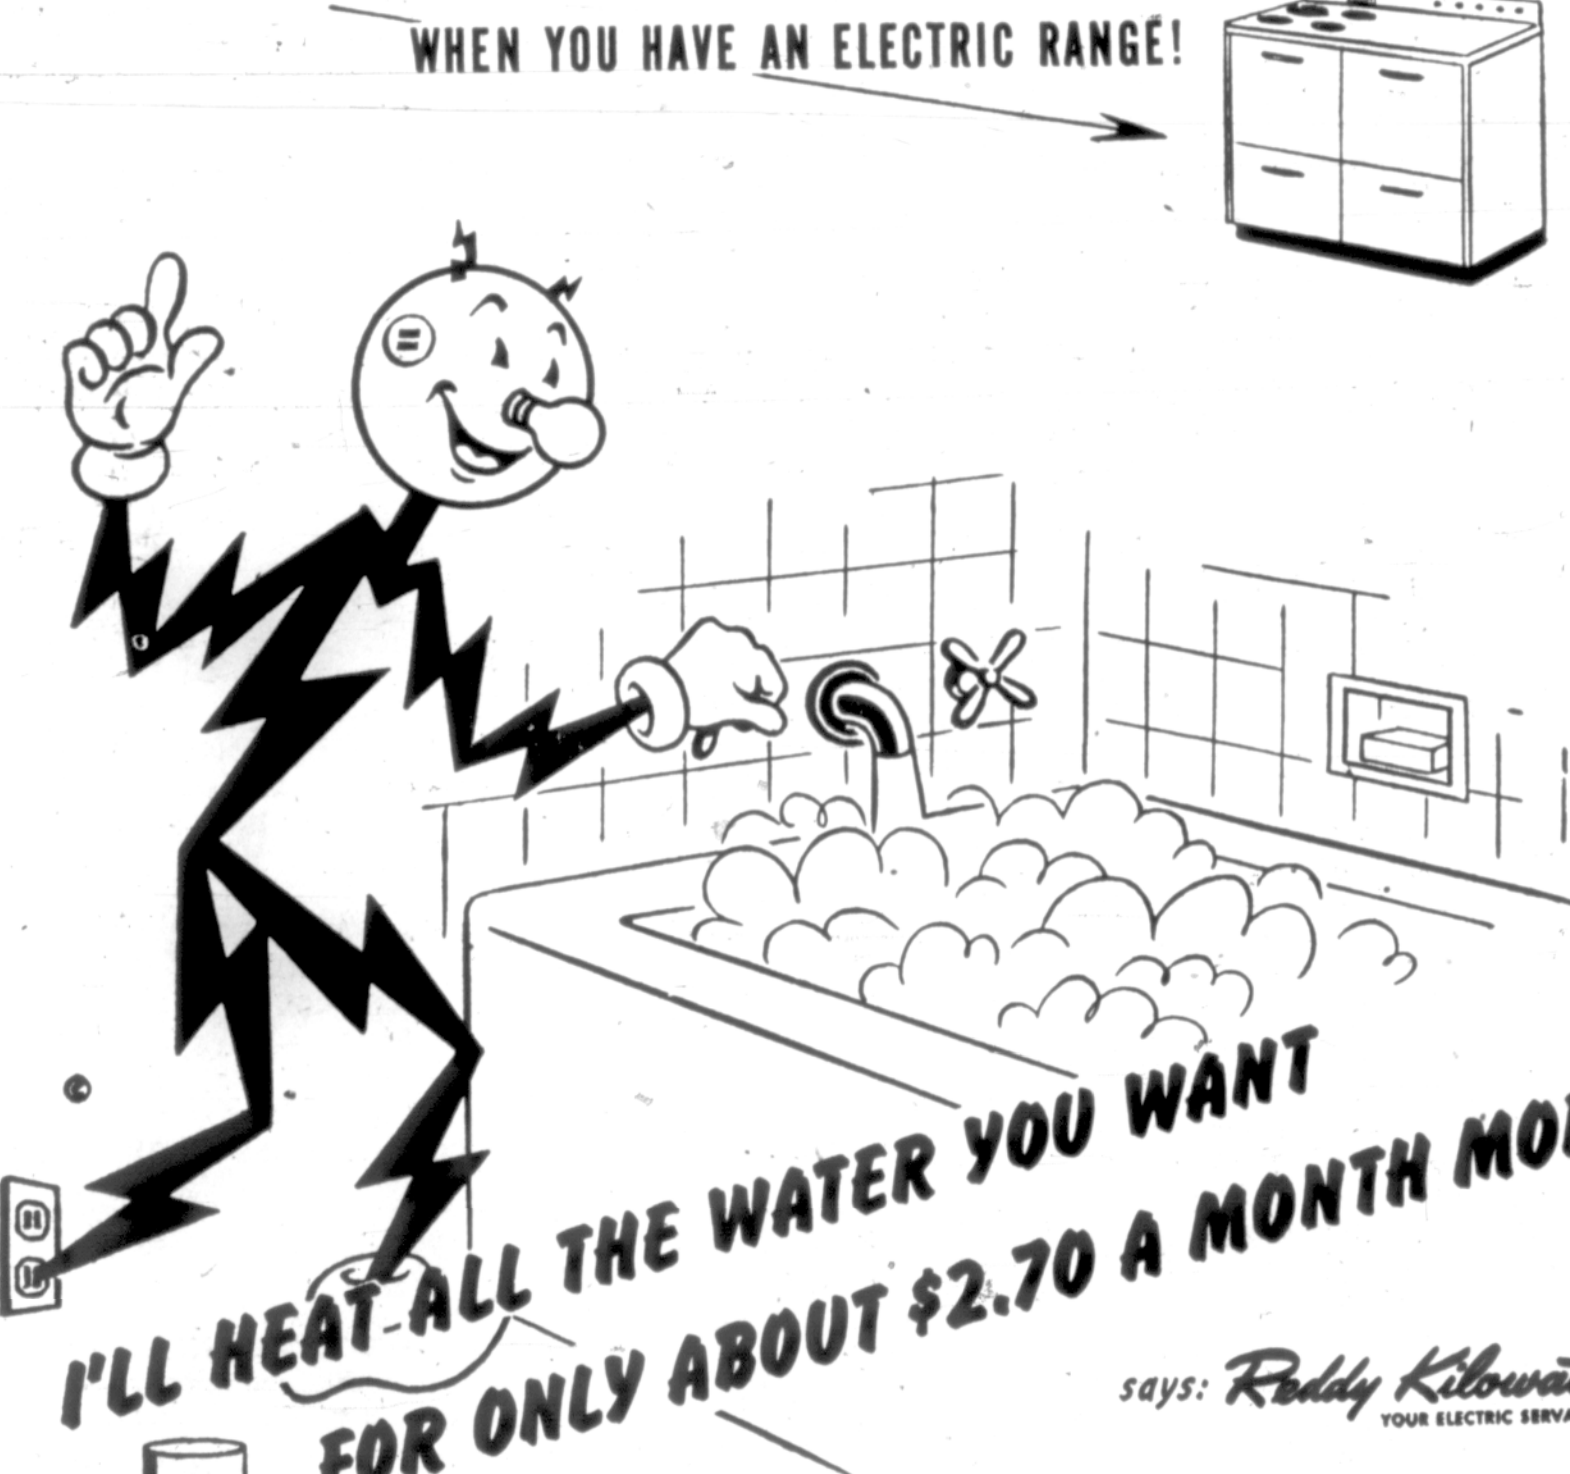

P.S. All above for sale at a bargain.
P.P.S. Put the feet in some of the above.

YOUR ELECTRIC SERVANT

IT'S BEAUTIFUL.

The modern electric water heater is streamlined and attractively finished just like your electric range and refrigerator. Put it in your kitchen if you like, for a thick blanket of insulation holds heat in the water.

AND IT SAVES CLEANING... no smoke or grime to dirty up walls and curtains.

AND IT SAVES WORRY... no turning on and off makeshift water heaters, or fixing up under coils. Install and forget it.

AND IT SPEEDS HOUSEWORK... you always have oceans of clean hot water to help you. No waiting.

When you cook electrically you can go on and buy additional electricity at a still lower rate... because PP&L's "all purpose" rate drops down to only 6 mills per kilowatt-hour after you've used 250 kilowatt-hours. So why not go all-electric? Use this cheap electricity for heating water the safe, clean, automatic way.
