**WARNING**

Safety is the rule of most individuals and we should always keep this in mind. One careless chance may bring injury or death to anyone of us. All children and most adults should be warned not to touch a wire hanging from a pole or laying on the ground. Report it to your local power and light company employees.

**200,000 miles of new long distance circuits will be built in 1946**

Big expansion program under way to speed your calls

This year alone, as part of a \$400,000,000 five-year expansion program, more than 200,000 miles of new toll and long distance circuits are planned for the Pacific Coast.

For we're on our way to providing a broader and faster long distance service than you have ever had before.

Everything possible is being done to expand long distance facilities now and to prepare the way for many new improvements to come. We handled more than 346 million toll and long distance calls in 1945 — nearly a million a day — and we're gearing up to handle an ever-increasing volume as the West continues to grow through the years to come.
