SOMETHING to REMEMBER

The West's great cattle industry, born in 1860, a year before the Civil war. The beginning: A few singly beasts of burden—exhausted Oregon Trail oxen—fattened into beef stock on Montana territory's lush pastures. Today "beefsteaks" from Montana are premium quality!

Something Else to Remember

The smooth, satisfying mellowness of Corby's! Even before the historic cattle incident in Montana, Corby's was a grand old Canadian name synonymous with fine whiskey. Today Corby's, a light, sociable blend, carries on this quality tradition. Ask for it next time!

ROAD OF THE STRAIGHTNESS AND THE CHALLENGES

IT COSTS More TO BUILD AND OPERATE A POWER SYSTEM, TOO!

Everything costs more these days, including the many items needed to construct and run an electric system. For example, the price of a standard cedar pole has doubled since 1940... our taxes have increased 70%... average wage rates are up 44%.

...yet PP&L has cut average electric prices 30% in the last 6 years!

It seems too good to be true. But just look at the record: Today PP&L's average rate for residential electric service is nearly one-third less than what it was in 1940!

How has this been accomplished in the face of sharply rising costs? The answer is hard work... efficient management... 36 years of electrical "know how"!
