THE SMART FAMILY

"JOANIE—," I said the other night when the Smarts were entertaining us at dinner—"What, no cocktails?" (Of course, it was only fun, I know as one of the Smart's oldest friends they never use alcoholic beverages.) Joan, however, smiled right back and said, "Maybe you won't believe this, but I am scientific enough to believe that the enjoyment of deliciously prepared food is not strengthened by an alcoholic cocktail—but on the contrary—the taste, and therefore the enjoyment of a dinner, is dulled."

New vacuum tube equipment will speed long distance calls

Long distance expansion program in full swing

At dozens of places up and down the Pacific Coast we're going ahead with new vacuum tube equipment which boosts the number of telephone calls wires can carry.

This is just part of our unprecedented long distance expansion program now under way.

For the phenomenal development in this part of the country has resulted in a tremendously increased number of toll and long distance calls. (In 1945, for example, we handled nearly a million a day.) But we're working full speed ahead to install the additional facilities we need to provide a better and faster long distance service than ever before.

One always stands out

* "RHAPSODY IN BLUE" is a modern symphony which has played itself into the hearts of Americans throughout the land. First performed at Aeolian Hall in New York, February 12, 1924, it fast became recognized as a symphonic jazz classic. Other musical interpretations of life in these United States have since been written, but among them all, the "Rhapsody" stands out.
