Moro Variety & Remedy

We've got some. Yes, lumber. Really. And, we can sell it. Somebody has changed a rule or a regulation some place about something and we can let you lumber.

That is, what we can get. We have flooring, siding and shiplap, all pine and all kiln dried so it won't shrink like a politician's promise. Also there is some foot boards, of pine, that would serve to patch a feed pen very nicely.

In addition there is Firtex, either plain or in the tiled variety that is more decorative.

We think we can get more lumber if we sell this bunch.

THIS CITY OF 12,000 SPRANG UP LAST YEAR ...can you name it?

Of course you can't, because it doesn't really exist all in one place. Part of it is right in your own community. But if you put together all the 3,039 new homes served in the past year by the PP&L, you'd have a city of over 12,000 inhabitants.

Population growth like this means that there's greater business activity in the region. For example, in the last 12 months alone PP&L has connected up 84 new industries and 638 new commercial establishments.

This all adds up to the impressive evidence of continued and healthy growth of the progressive region which PP&L has been helping to develop since 1910.

CHEAP AND ABUNDANT POWER for a growing region
Today PP&L is supplying 64% more power than in 1940, and the average price it receives has dropped 27%.
