**WALK DOWN THESE STEPS  
to better living and lower prices!**

When you buy another appliance for your home, you'll find that electricity for operating it costs less than you expected. For under PP&L's progressive "all-purpose" rate the more electricity you use the lower the cost.

The chart above shows how the price goes down as your use increases. For example, after you've used 125 kwh a month the price drops down to 1 1/2¢ a kwh, after 250 kwh the price is only 6/10 of 1¢!

Take advantage of these electric rates that keep getting lower and lower. Plan now to go all-electric. Keep in touch with your dealer for latest news about those comfort-giving, labor-saving electric appliances.

**PEOPLE LIKE  
MY WAGE SCALE**

Thanks to "bulk" rates, like the one pictured above PP&L customers use nearly twice as much electricity as the national average at only half the national average price.
