Come as soon as you can.

This year alone, we have added 305,000 telephones

They're going in as fast as we are able to install them... the telephones needed on the Pacific Coast. In 1946 alone, we have already added more than 305,000 and thousands more go into service every month. But there is still a big job ahead.

Complicated switchboards, cables, dial equipment and even new buildings have to be built before everyone who wants a telephone can get one. This will take time because our progress is handicapped by shortages of materials and by the disturbed conditions throughout the country affecting manufacturers' output and our construction projects. Meanwhile you may be certain that we will do everything we can.

For it is our purpose in our huge expansion program to provide service for everyone who wants it just as rapidly as possible... better service than ever before... a more valuable service to every user. We are spending this year for gross plant additions an aggregate of \$130,000,000 which exceeds by \$55,000,000, or 73 per cent, our previous highest yearly plant expenditures in 1941 of \$75,000,000.

An ever-improving telephone service at the least cost consistent with good wages and working conditions for our employees and a reasonable return to the thousands of people who have invested in the business.
