From where I sit... by Joe Marsh

Willie Goes to School at 23

Everybody's joshing Willie Wells about going back to school. They remember when Willie would hide out in the woodshed—scared to bring his report card home to Pa.

But under the G.I. Bill of Rights, Willie (who has a wife and baby) is getting a free education at the Agricultural College. And Uncle Sam is giving him a fine report: "Department, excellent; Progress, above average."

That goes for all those undergraduate veterans. Like Willie, they appreciate an education more than

ever now. They're industrious and well-behaved—their favorite beverage is milk, or a temperate glass of beer. For them the "three R's" seem to mean: Responsibility, Resourcefulness, Restraint.

From where I sit, cynical folks who thought veterans wouldn't want to return to school—wouldn't stick to steady habits of work and moderation—have their answer in "undergraduates" like Willie.

TIME

...is money.

Modern methods save time and energy for Oregon farmers. Tractors and bulldozers accomplish efficiently and quickly jobs that would otherwise take a long time to complete. You are invited to see this bank concerning a loan to assist in the purchase of such needed equipment.

Worth Waiting For!

And worth dreaming about — for that new appliance that you are waiting for will be A BEAUTY! We've been waiting, too, for needed electrical equipment, but production figures all along the line are hitting new highs. You can be sure that the new water-heaters, electric ranges, dishwashers and refrigerators mean added hours of leisurely electric living for your family — but, best of all, they'll be extra easy on the budget, for PP&L electric rates are only half the national average.

Yes, your new electric appliances ARE worth waiting and saving for.
