**4,000 More "Tailors" for Reddy Kilowatt**

When Reddy Kilowatt comes shooting across the country on those big PP&L transmission lines he's 69,000 volts strong. Before he can be used in your home he has to be "tailored" down to 120 or 240 volts to fit your needs. A transformer acts as the tailor.

This year PP&L plans to install more than 4,000 transformers. Some of them—the big transmission type—will cost as much as \$100,000 each. Our 1948 construction budget is the largest in history.
