We do lots of things

There's the bus station, and newspaper agencies, Oregonian, Journal, Chronicle and MHS Optimist too, and the public phone, and magazines and we feed you and refresh you. Quite a place we have, come in. We can do something for you.

## THE TAVERN

STOP You May be the Other Fellow This Year!

Are you content in the belief that it always hails on the other fellow's farm? Suppose you are the other fellow this year!

Hail will not skip your farm forever. Records show that no farm or section is immune. Sooner or later you will be the other fellow!

This year, protect your high production costs and expected income with a Hail Insurance policy. You have more at stake than ever before. Five minutes of hail can destroy your year's work and income.

Play safe! Buy Hail Insurance. We will gladly give you complete details. No obligation. See or call us. Act today to save tomorrow!

From where I sit... by Joe Marsh

Jeb Had the Folks in Stitches!

At the Friday Night Social, Jeb Crowell had the audience in stitches—doing a take-off on the blustering character who belittles everybody and everything that isn't from his own home town.

Well, we can laugh at that sort of character because from where I sit, Americans are just the opposite. We like to boast a bit ourselves, about the paint job on the new barn, or the misssus' style of cooking—but we aren't intolerant of people who don't think or act exactly the same way we do.

In our town, for instance: Some folks like band concerts, others don't—some families serve beer with dinner, others, buttermilk—and as for politics, there's plenty of healthy disagreement.

But when it comes to denying folks the right to think or act as they choose... no, we're like you—we don't believe in it, whether it goes for serving beer, or speaking one's mind on public affairs.

Joe Marsh

"WORLD'S LONGEST SPEAKING TUBE" now pipes calls East

1. Imagine packing 500 voices together in a tube no bigger than a pencil and sorting them out distinctly at the end! That's what we're doing with coaxial cable. Radio-type waves whisk calls through pipes... instead of on wires...allowing one "co-ax" to do the work of a number of the more usual kinds of long distance cable.

2. We plant "co-ax" with giant plows that lay the cable in one operation. Every eight miles a "booster station" keeps calls going through clearly. For—incredible as it seems—high frequency waves fade so rapidly in the cable that all the sun's energy, if it could be funneled into the pipes, would not carry half-way across the country.

3. "End of the line"...it takes huge panels of complex equipment like this to sort out the calls carried by just one cable. Since December, calls have been going back and forth from the Coast to the East over 2300 miles of "co-ax." And we're adding still more cables to augment long distance service for the growing telephone population on the Coast.

Millions of new working dollars, need to extend and improve service, must come—not from telephone bills—but from thousands of people who put their savings to work in the telephone business. To attract these working dollars, we must pay a reasonable amount for their use. We can do this only if we sell our services at fair and adequate prices.

The Pacific Telephone and Telegraph Company

More than 70,000 people working together to furnish ever-better telephone service to the West

KEEP U.S. SENATOR GUY CORDON ON THE JOB!
