7A Model weighs approximately 1200 pounds. Works better under difficult conditions than lighter machines.

Every machine can be assembled as a right hand or left hand drive machine. Very strong, heavy goosenecks.

The transport, weighing nearly three hundred pounds is the right distance behind the revolving rod. Tiller wheel assemblies work perfectly and last longer.

The straight chain drive on Cheney Weeders is not excelled by any other kind of drive. There is plenty of clearance for stubble and weeds.

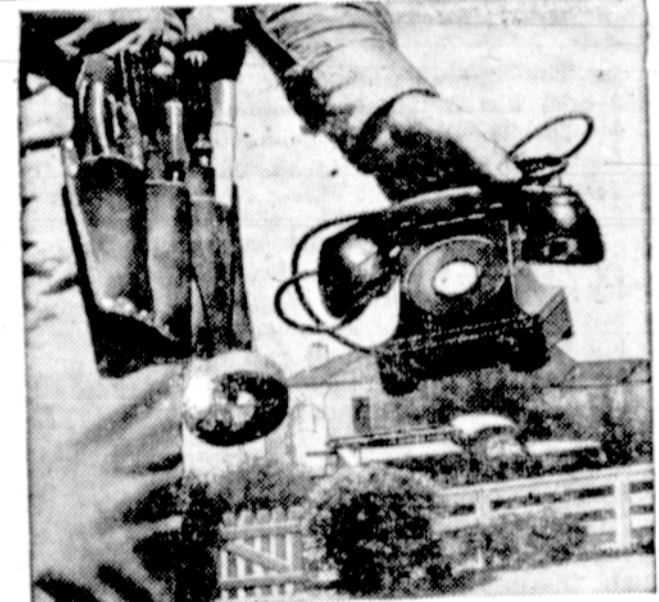

For nearly forty years Cheney Weeders have satisfied farmers who want the best. Cheney's are strong, convenient and dependable.

R. H. McKean & Son of Wasco, Oregon have been distributors of Cheney Weeder products ever since these valuable implements were first invented. The Cheney Weeder Company also builds the Cheney SOIL SAVER plow which is recognized as a very successful tillage machine to work the ground properly and to hold it in place.

McKean & Son carry a good stock of Cheney's products and can supply you immediately with these well built and profitable implements. See them at

Who pays for new telephones?

1. This sight represents a lot of money. For the land, buildings, equipment, and wires needed to serve each new telephone cost us far more than prewar... just as the things you buy cost more. To meet the West's growing telephone needs we're putting more than half a million dollars to work every day.

2. This complex equipment can't be paid for out of telephone bills... it takes a lot of new money furnished by investors. But the telephone bill does play an important part. It covers wages and taxes and other costs of services and—when rates are fair and adequate—leaves a few cents profit to pay investors for the use of their money.

3. Can a housewife pay for new telephones? Many do. For many thousands own telephone stocks and bonds. Money for a vast amount of new facilities comes from such investors. To keep the system growing and improving, we must keep on attracting new money to pay for it. We can do it only if we sell our services at fair and adequate prices.

4. When you make a local call, your cost averages less than a nickel. For those few pennies you hire a mighty servant... a bigger servant than ever before. There will soon be twice as many telephones on the Coast as ten years ago. More are being added. And each new one makes your telephone just that much more valuable.
