DON'T PUT UP THIS SIGN!

New industries can't come to Oregon now if they use large amounts of electric power. There's an actual power shortage in the state.

Why haven't more power dams been built? One big reason is an obsolete Oregon law that discourages building of hydroelectric plants by power companies.

The last state legislature corrected the law that is holding up Oregon's progress. It made Oregon power laws conform to the Federal Power Act. The vote was 70 to 20! Now the modernized hydroelectric law is submitted to the people for approval, in the form of Referendum 306.

Why Require Purchase of a Bottle? LEGALIZE LIQUOR BY THE GLASS!

Let's quit kidding ourselves! Is it sensible to encourage the purchase of unlimited quantities of liquor by the bottle and at the same time have it illegal to purchase even so much as one drink of liquor by the glass?

Yet that is the situation in Oregon today... a situation the Oregon Liquor Dispensing Licensing Act (314 X YES!) is designed to correct by making it legal to purchase liquor either by the bottle in state liquor stores, as at present, or by the glass in state-licensed and supervised establishments.

For several months now, our state liquor stores have been holding "bargain sales" announcing attractive reductions in prices and encouraging the public to buy more liquor by the bottle.

One commissioner stated recently that as a result of this "merchandising" state liquor inventories had been reduced by some \$2 million.

Figures for the year 1947 show that in per capita liquor consumption, Oregon with its exclusively by-the-bottle system, consumed more per capita than seven of the nine states which offer the public the choice of bottle or glass.

STATE	1947 PER CAPITA LIQUOR CONSUMPTION
OREGON	1.62—Bottle only
Vermont	1.60—Bottle and Glass
Wyoming	1.58—Bottle and Glass
Maine	1.48—Bottle and Glass
Michigan	1.25—Bottle and Glass
Idaho	1.18—Bottle and Glass
Ohio	1.12—Bottle and Glass
Pennsylvania	1.08—Bottle and Glass

Liquor by the glass, as well as by the bottle, was made available in our neighboring state of Idaho on July 1, 1947. Consumption declined immediately.

Idaho per capita liquor consumption:
1946 (bottle only) 1.23
1947 (bottle and glass) 1.18

Some people think that consumption will decrease if you make liquor hard to get.

Actually, the harder a thing is to get, the harder people will try to get it. During the war, when liquor was scarce, did consumption decrease? No, it increased! Here are the figures!

Decrease in Oregon Per Capita Liquor Consumption Since the War Years.
1945—1.77 1946—1.72 1947—1.62

Let's have common-sense liquor regulations.
