POWER SHORTAGE
The northwest is one of the most acute shortage areas for electric power and who would have believed that a few years ago...

WHAT DO YOU KNOW, JOE?
If one wants to find out how little he knows about any subject he has only to start writing it down...

There is a contest that may be resolved to the benefit of the citizens of the northwest; that is the partial control of the power and irrigation by local agencies.

There is a long ways from Washington to the northwest and there is little chance that many of the legislators who will govern the policy will ever see this area.

GAME PROGRAM
Oregon's legislature had a committee appointed to study the game and fish situation in the state and it is now preparing a report for the coming legislature...

PROSELYTING
The news that citizens of The Dalles (still unidentified) have been active in getting high school boys handy with a football to move to that city to strengthen the high school football team...

MAKE THIS A NEVER-TO-BE-FORGOTTEN Christmas!
A DEXTER TWIN in your home on Christmas morning will surely make this Christmas one to remember, always.

THOSE FUNNY AMERICANS
Men who write about foreign lands agree that they consider our American political institutions very peculiar. As a matter of fact they are.

From the G. V. J. Dec. 12, 1919
Leta Vawter of Medford arrived last Friday to spend some time with her parents, Mr. and Mrs. J. O. Garrett.

From the Observer, Dec. 13, 1929
Mr. and Mrs. John Eva left Moro by auto Wednesday morning for Arizona, expecting to spend the winter in that state.

From where I sit... by Joe Marsh
The Missus "Ducks" Out
Slim Hartman took his missus duck hunting the other day. And after five hours of sitting in a swamp, she'd had enough! Going home, Slim reminded her good-naturedly of the time she'd taken him to a woman novelist's lecture, and insisted that he sit it out.

BIG VOICE IN A TINY PACKAGE
How a new voice booster the length of a shoelace tip may help with your telephone call
1. It's a mighty mite, that tiny cylinder. Tests have shown it can amplify sound at least 100 times... just like the vacuum tubes in your radio.
2. A giant model lets you look inside the Transistor... it contains only two tiny wires or "cat's whiskers"... touching a bit of the rare metal germanium. It is much simpler than a vacuum tube and does not require continuous heating... an important item in the 24-hour-a-day service we render.
3. It will take some time for engineers to perfect this invention. They're working ahead at it and some day it may be used in central offices and repeater stations up and down the Coast. It's one example of how research helps improve service... making your telephone a better buy year after year.
4. Such inventions as the Transistor and coaxial cable... as well as better day-to-day operating methods and more efficient equipment... are developed for Pacific Telephone and other Bell System companies by a centralized laboratory and engineering group. This has been working successfully for years. Combining efforts and sharing costs in this way have proved to be much more economical and effective than if Pacific Telephone tried to make such developments alone... developments which have steadily improved service and have resulted in a saving of untold millions of dollars to Pacific Coast telephone users.

IN DAYS OF OLD
Elwood Thompson and Mrs. Neal McDonald arrived Wednesday to be with Grandpa Isaac Thompson, who slipped on an icy walk Tuesday dislocating his hip. H. A. Stuart came up from the railway camp at Deschutes. He
