James Reed, printer at the Sherman County Journal had an experience with the cold that was unique. The grease in the transmission of the family car had been placed in while residing on the coast. It was so heavy and thick that the cold nip of last week set it fast. The rear wheels would not turn and it was necessary to unsbolt the housing and then the use of a hot flame, got the car in running order.

Time to Save Electricity!

4:30 to 6:30 EVERY WORKDAY AFTERNOON

At Christmas-time the use of electricity always reaches a new high. This year the situation is serious, because big new power plants couldn't be built fast enough to keep up with the demands of this fast-growing Northwest. There may be a complete breakdown of electric service unless everyone reduces his use of electricity. The critical hours are 4:30 to 6:30 in the afternoon. Please save electricity during these hours...every way you can.

Pacific Power & Light Company
