**WHEN FATHER CALLED NEW YORK**

How in a few short years, Long Distance has speeded service, improved clarity lowered rates

1. Back in 1918 it was quite a thing to call long distance all the way across the country. Took a good set of lungs, too. In those days you had to use as much voice to talk long distance as you would in calling to another person eighty feet away across an open field.

2. Today it's just as easy to talk across the nation as it is to talk to someone just across the table from you. Continual improvements in the telephone instrument you use, in telephone lines and cables, in voice-boosting equipment along the way, make a normal voice carry 3,000 miles or more with ease.

3. Rates have gone down amazingly. In 1918, Father paid about \$18.00 for the miracle of talking Coast-to-Coast. Worth it, too. By 1928, we'd been able to drop rates to about \$9.00 for a three-minute station daytime call. And today you can make the same call for just \$2.50, plus tax. Here's one of today's big bargains.

4. Takes less time today to get your connection. Now calls go through in an average of less than two minutes. These are just a few examples of the way telephone service grows in value... becomes a better buy. A local call still costs just a few pennies. Compared to other prices, telephone service is one of your biggest bargains today.
