A MILLION POUNDS OF NEW WIRE will be put into service by Pacific Power & Light crewmen this year. New substations, generators, poles, other equipment will bring 1949 PP&L construction budget in this growing region to more than \$9 million.

Cost of new construction by Pacific Power & Light since V-J day will total more than \$25,000,000. These are development dollars. They are taxpaying, job-making dollars, invested here in the Northwest to help meet your electrical needs.

Power requirements of this fast-growing Pacific Northwest demand a steady flow of these development dollars. That is why all of us want investors to look on this region as a land of opportunity, and of fair reward.

The investor whose dollars help extend and improve your low-cost electric service, while sharing your tax burden, is truly a Partner in Progress!

Building Oregon Together

WELDS STEEL INTO BOAT WORKS. Since G. M. Nichols (left) first tried his hand at boat building in 1941 on the Columbia River, his G. M. Nichols Boat Works at Hood River has constructed 40 welded steel craft. In developing this Oregon business, Nichols has had the help of his two sons, Frank (shown here at right) and Victor (not in picture), in addition to his partner in Portland, Capt. Harry A. Bell. Most Nichols-designed boats, including ferries at Arlington and Patterson, are of a shallow-draft, tunnel-stern type. Three deep-sea trollers and 35 highly maneuverable tugs have been built. "Whatever our financial needs, Hood River Branch of First National has had the answer," Nichols said.

A MEDICAL CENTER IS BORN. First National Group banks take genuine interest in community betterment endeavors of individuals and groups. An example is the Moreland-Sellwood Bank's financial cooperation in establishment of the Moreland Medical Center. This privately owned and operated Center, with its medical and dental equipment and space for future growth, adds another convenient health facility to this growing section of Portland. The Center overlooks the Willamette River. Building was finished and opened in 1947. Shown at Center's entrance are Staff Members Gloria Stevens (left) and Jean Heitkemper, RN.

These people are builders of Oregon—among the thousands who produce the unusually wide variety of services and products in our state. Each helps create more jobs and opportunities for all of us.

Yes, Oregon's growth is dependent upon people working together—family by family, farm by farm and business by business. We in the First National Group work with citizens—by making constructive financial services widely available.

"LET'S BUILD OREGON TOGETHER"

SUCCEEDS AS PAPER CONVERTER. Ten years ago Dick Kay, a salesman, saw greater opportunity in manufacturing paper packing supplies for Medford area fruit growers. He started modestly in rented quarters, waxing large sheets of paper chip board and converting it into liners and pads for wooden fruit boxes. "It was tough getting started," said Kay, "but the Medford Branch of the First National Bank saw me through." Today Kay Paper Products, Inc., in its own two-story building, die cuts 12,000,000 pieces of paper packing materials annually, in addition to specialty pear-packing items. Kay's firm also is a jobber for corrugated paper boxes.
