"We welcome private investment. It shows faith in the future of our region."

MILAN SMITH  
President, Pendleton Chamber of Commerce

TRANSFORMERS are needed to "tailor" electric energy voltage to fit customer needs. Transformers vary in size from small pole-top installations to huge, 90-ton substation types. Hundreds of new units, of all sizes, will be installed on all parts of the P&L system during the company's big construction program this year.

Cost of new construction by Pacific Power & Light since V-J day will total more than \$25,000,000. These are development dollars. They are taxpaying, job-making dollars, invested here in the Northwest to help meet your electrical needs.

Power requirements of this fast-growing Pacific Northwest demand a steady flow of these development dollars. That is why all of us want investors to look on this region as a land of opportunity, and of fair reward.

The investor whose dollars help extend and improve your low-cost electric service, while sharing your tax burden, is truly a Partner in Progress!
