MORE CIRCUIT-BREAKERS costing about \$20,000 each are being installed this year on the PP&L system. They are "fuses" to isolate trouble areas and improve efficiency of the Northwest Power Pool. PP&L is a pioneer partner in the Power Pool, which ties together the 300 public and private power plants of the Pacific Northwest.

Pacific Power & Light Company has spent \$25,000,000 on new construction since V-J day. These are taxpaying, job-making dollars—development dollars—invested here in the great Northwest to help meet your electrical needs.

The power requirements of a fast-growing region demand a steady flow of these development dollars into the Pacific Northwest. That is why all of us want investors to look on this region as a land of opportunity, and of fair reward.

The investor whose dollars help extend and improve your electric service, while sharing your tax burden, is truly a Partner in Progress!
