Tightly-Drawn Bolts **Deeply-Drawn Corrugations**

BOLTING - The Strong, Tight Method of Covering Steel Buildings
Proved By More Than 30 Years Use

There are only 3 practical ways of fastening metal together - welding, riveting and bolting. Bolting has proved to be the best way of tightly fastening sheet metal to structurals. Butler Buildings, erected 30 years ago, stand today without a loosened bolt, leaky fastener hole or rattling sheet.

Also, in more than 30 years, no method of stiffening and strengthening metal sheets has been found that approaches the Butler deeply-drawn and shouldered corrugations.

Complete Line of Sizes: 20, 32, 40, 50 and 60 foot widths. Lengths variable.
