Harvest Command AT YOUR FINGERTIPS...

with a McCormick No. 125-SPV Combine

With the McCormick No. 125-SPV combine you have full command of your harvest. You are master of every crop and harvest condition. You can harvest faster and easier—open fields without waste—save more grain. You ride in comfort above the dust. You see where you are going and what you are doing. You can watch the work of the header below you, or check the contents of the low-mounted tank behind you. All controls are right at your fingertips. A touch on the hydraulic control lever instantly adjusts the platform cutting height. Depress the clutch pedal and the machine halts, but the separator keeps right on running to clear itself. Four forward speeds and one reverse give you the right working speed for every field condition and a fast travel speed between jobs.

We'll be glad to tell you more about the outstanding features of this year's model. Come in and see us.

The new telephones put in daily mean more value for all. You can reach more people...more can reach you.
HE'S MAKING YOUR TELEPHONE A BETTER BARGAIN
How your service grows more useful as we add new telephones

TELEPHONE GROWTH
1940 1,982,000 TELEPHONES
1950 4,084,000 TELEPHONES

1. In the ten busiest years we ever had, the West's population jumped more than fifty per cent. Telephone service grew even faster... the number of telephones at work in the West has doubled. And we built this new system in the face of inflated postwar costs...for we can't, in contrast with most businesses, defer the addition of plant just because the cost is high.

2. You may never call this particular telephone... but it's pretty certain you will want to call or hear from some of the telephones we're adding. As the West grows, new people come into your town... others move their homes and businesses... so it is necessary for us to do our best to keep pace with the growth of your community to make sure you can call whom you want, when you want.

3. As a part of a bigger system, your telephone is a bigger value today...particularly when you consider the low rates you pay for service. Long distance telephone rates actually decreased between 1940 and 1946. And, while the increases in local and long distance rates since 1946 vary, the average for the territory we serve has been only 27 per cent. Your telephone still gives you a big value for your budget dollar. It's one of today's best bargains.
