Crochet Kinks

If you're busily finishing a crocheted piece for entry in the Nationwide Crochet Contest at the Sherman County Fair which begins September 15, you might welcome a bit of information on how you can show off your treasure to best advantage. You can do this by using the same principle that you apply to your appearance. When you're going some place special it's natural to want to look your best. At such times your faithful iron will fulfill its obligation of pressing away all wrinkles and creases, so that your clothes will look neat and attractive. That's one of the finishing touches that gives you a well-groomed look. The same holds true for the crocheted pieces that you've worked on so lovingly and carefully. When you've finished the last picot or scallop, your work is nearly complete—nearly. The final step, and a very important one, is the laundering, starching and blocking. One of the judging points in the Nationwide Crochet Contest is general appearance, so if you're aiming at a share of the \$2500 in cash offered as contest prizes you will want to pay special attention to the following three steps.

If your piece needs laundering when it is finished, make a lather of soapy suds and hot water, taking care to have all soap particles well dissolved before immersing the lace. Now squeeze the lace gently, forcing the suds in and out, until it is thoroughly cleansed. Rinse in lukewarm water several times until all traces of soap have been removed. Rinse once in cold water and roll up in a bath towel to absorb excess moisture.

After your lace has been laundered, dry thoroughly before starching. Not all crocheted pieces need starching, but certain dollies and fashion accessories call for it. You can make a starch solution suitable for the article you wish to stiffen. For a heavy starch, mix 1/2 cup of starch with 1/2 cup of cold water. Stir until completely dissolved. Then add two quarts of boiling water and cook slowly, stirring constantly.

To block your face, pin the damp article face down with rust-proof pins to a padded ironing board, gently stretching and shaping it to the measurements specified in the directions. Pins should be spaced about 1/2 inch apart. Press through a cloth. If the lace does not require laundering or starching, pin it dry in the same way and use a damp cloth for pressing. Raised patterns should be placed face down over heavy toweling.
