Wilbur Shaw thinks so much of this new Chrysler, he has selected it as Pace Car for the 1951 Indianapolis 500-mile race.

WILBUR SHAW, AMERICA'S MOST FAMOUS DRIVE, DRIVES NEW 1951 CHRYSLER—REPORTS TO YOU ON REVOLUTIONARY FIREPOWER ENGINE AND HYDRAGUIDE POWER STEERING

Here are Wilbur Shaw's reactions—in his own words—as taken down by a recording machine in the car:

"The '51 Chrysler has it! With this new engine and power steering, the first on any U.S. car, it's a whale of an automobile."

"I'm completely bowled over by the ease of steering! This steering combined with the automatic trans-

mission . . . is the nearest thing to an automatic pilot for a car I can possibly imagine."

"This engine . . . I can't get over the amount of power and snap in this engine . . . it's incredible!"

"I drove 111 miles with the feeling I had expended no more effort than in driving around the block."

"When Mrs. Shaw drove, her comments just about squared with mine. Here's what she thinks of the 1951 Chrysler . . ."

Mrs. Shaw: "At first I could hardly believe the ease with which I could turn the wheel. That's important . . . especially in the summertime."

"Often after I have parked a car in the average parking space, I feel I should taxi home, shower and get dressed again. But with Hydraguide Power Steering I parked it with one hand. It practically drives itself."

Wilbur Shaw: "It's hard to describe this new Chrysler without going off the deep end . . . it has it in every department."

"In fact, I think so much of this car, I've selected it as Pace Car of the 1951 Indianapolis 500-mile race!" (Mr. Shaw's comments are reprinted through the courtesy of Popular Science Magazine.)

*Mr. Shaw refers of course to standard passenger cars—not racing cars or special models.

"THE CASE OF COSTELLO" . . . Grim through most of his ordeal consisting of his questioning by the senate crime committee, Frank Costello (left), recently was forced to grin broadly at the large size of the briefcase displayed by his laughing attorney, George Wolf. As Costello was queried on his financial condition, Wolf placed the huge case on the table, bringing rounds of laughter from the spectators, committee members, and witnesses.

FOOD BOUGHT by ONE HOUR OF LABOR

The average American worker today can buy more food with an hour's labor than at any time in recent years, despite advanced retail prices, according to reports submitted to the House Agriculture Committee by Secretary of Agriculture Charles F. Brannan.

"An hour's earnings in a factory may buy less of some things now than it has in the past, but it will buy more food," he said.

Comparing February, 1951, purchasing power with other years, the figures showed that an hour of factory labor buys 25% more bread than in 1939, 50% more than in 1929 and twice as much as in 1919.

Analyses show that bread also contains more actual nutritive value, penny-for-penny, than any other food, according to the American Bakers Association. The baking industry this year is observing the tenth anniversary of white bread enrichment, which nutrition experts declare has improved materially the health of the American people.

Citing this improvement in health, Dr. Elmer L. Henderson, president of the American Medical Association, states that "I do not think it is too much to say that a very important part of the more buoyant health and increased mental and physical vigor the American people enjoy today can be directly credited to the enrichment of bread with essential vitamins and minerals."
