How to make good telephone service even better . . .

You speed Long Distance service when you place your call by number

In these busy telephone days, when so many calls that help build our nation's strength are going over Long Distance lines, you'll find your operator can give you much faster service on your out-of-town calls if you give her the number you want rather than just the name and address. That way, you see, you won't have to wait while she calls "Information" to get the number you're calling. So why not start your own out-of-town number list right away?

best way to keep

out-of-town numbers is in a handy booklet, kept near your telephone. One way to get the numbers is by asking your friends for their number whenever you're in touch with them.
