People have asked... **"Oil Progress? Should that mean something to me?"**

The oil companies of America are now observing Oil Progress Week. Some people outside the industry have asked, "Oil Progress? Should that mean something to me?"

The answer is "Yes, indeed!"—for oil progress directly affects the lives of all Americans, and the rest of the civilized world as well. One indication of the strides the industry has made is a count of its products. Fifty years ago, we were getting only about a dozen different products out of crude oil. Now Standard produces more than 1100. What we ourselves produce, plus what's made with the help of products we provide, adds up to a seemingly endless list of things that make your life better.

natural gas, hydraulic oil, motor machine oil, floor wax, plastic cement, printing inks, automobile oil, carbon paper, roof coating, detergents, leather oil, egg oil, shoe polish, paint cleaners, paraffin wax, fly spray, etc.

oil, instrument oil, wood preservative, water, etc.

petroleum jelly, waterproof canvas, etc.

motor oil, cold cream, ice cream, etc.

oil sprays, gum wrappers, paper, etc.

oil, adhesive tape, naphtha, metal, etc.

aluminum asbestos coating, etc.

photographic film, cup grease, etc.

fluid, water softener, etc.

milk cartons, cylinder oil, etc.

fixed bases, mineral spirits, etc.

Your car can be "like new" longer with a motor oil developed by Standard's scientists using atomic energy. It cuts engine wear as much as one-half, compared with conventional oils.

stern oil, absorption oil, mineral, concrete pipe form oil, soap, rust preventative, dynamite stick, automobile washing compounds, paper, marine insect spray, surface coating, textile oils, caulking compounds, pantograph grease, rubber boots, aviation gasoline, heavy duty, etc.

crayons, liquefied petroleum gas, after shave lotions, ice machine, etc.

Your cleaning chores are easier thanks to today's new detergents. Standard provides a large portion of the nation's needs.

The growth of the industry over the years has meant the development of thousands of oil companies, large and small. All are needed—to serve

you better, and keep the nation strong. As the industry progresses, the gain is yours... for your progress and oil progress go hand in hand.
