**YOUR WEED PROBLEMS**

Experiences of the past few years have demonstrated the economical effectiveness of chemical weed control in practically every branch of agriculture. Dow has developed a variety of control chemicals for nearly every weed problem.

**Esteron 44 & 2,4 Dow Weed Killer Formula 40** were especially formulated for the control of weeds in grain and grass crops and in pastures.

**Esteron Brush Killer** not only aids in clearing new acreages but prevents the encroachment of line brush and weeds into valuable crop lands and pastures.

**TCA 90%** is a valuable help for the elimination of quack grass, Bermuda and Johnson grasses and other obnoxious weeds occurring along roadsides, fence rows, irrigation canals and drainage ditches or canals. Non-poisonous to feeding livestock and no long time sterilization.

**Dow Lindane 25% Wettable** is worthwhile as a year round control for flies and other insects in dairy barns, creameries and similar farm buildings. Economical because one spraying is effective for 6 weeks. It controls lice and mange mites on dairy cattle and other livestock.
