When you pay your telephone bill, about 28 cents of each dollar goes for taxes.

**How much tax in your telephone bill?**

When you pay your telephone bill each month, an important part of your money is passed on in taxes to the Federal Government and to state, county and city governments. Naturally, we expect to contribute our fair share of the cost of government... but because taxes now account for such a large portion of the cost of service, we feel we should report about them to you who, as telephone customers, have to pay them.

Your telephone is taxed in two ways: One, through the operating taxes we pay to run the business - income taxes, property taxes and the like. In 1951 these came to \$81 million for Pacific Telephone, an all-time high. Two, by Federal excise levies you pay on local and long distance service. Last year we collected more than \$70 million in excise taxes from our customers and turned it over to the Bureau of Internal Revenue.

TAXES \$2.92 PER MONTH PER TELEPHONE

In spite of sharp increases in taxes, wages, materials and other costs of providing service, we've been able to hold down the prices you pay for service... hold them so low, in fact, that the telephone today is one of the best buys in any budget.

**Pacific Telephone**

To give you some idea of the size of our tax bill, it is estimated that the total excise and operating taxes we paid in 1951... \$152 million... could have supported all the 131 schools of higher education in California. In terms of the average telephone, this is \$35 per telephone per year... \$2.92 per month. Twenty years ago the average was 53 cents a month.
