How to save starting time on gasoline and diesel engines

To make sure your engines will start on the first few turns in the coldest weather, give them a shot of Chevron Starting Fluid as you step on the starter. It has started diesels in 10 seconds at 30° below zero. Ask us about low-cost equipment that you can install on engines to make the use of Chevron Starting Fluid easier.

Avoid starting delays from ice-clogged fuel lines, too, by putting a little Chevron Ban-Ice Fluid in your fuel. It prevents freezing of any moisture that may get into storage tanks or lines.

Let us tell you about Chevron Starting Fluid and Chevron Ban-Ice Fluid today.
