Heard About the Electric
Weather Predictor?

Squint Smith built up quite a
reputation last month by predict-
ing the weather. What he said
usually came true.

It got so that folks would sit
around his little Antique Shop
just to get his opinion.

Last Monday, though, he said
he didn't know what the weather
was going to be like next day.
That surprised us and when we
asked what happened, Squint
said, "Slipped up on my electric
bill and was turned off. I'll get
to my radio again tomorrow
though." Squint had been getting

the weather over the radio—just
like anyone else!

From where I sit, that's the way
it goes with some "experts." They
often don't have any more inside
information than you can get for
yourself. Like those who "know"
cider is the only thirst-quencher
after a day's work. Far as I'm
concerned, I'll take a temperate
glass of beer. But—I won't try to
"predict" your choice for you.
