TRUCE On the good side of the truce is the release of prisoners of war and the cessation of killing.

On the bad side is the release of communist soldiers to fight in another part of the world where they may be more effective, the serious consequences of losing a war without positive results.

It may make us realize that the conflict between what we call democracy and what the Russians call communism is an ideological one which will never be settled by warfare.

Russians are not likely to rise against their government although the more independent Ukrainians may do so.

If the west wins the battle of thought it will have to find a means of producing better propaganda, inciting less opposition to our well-fed arrogance and showing the millions of poor in the world that the way of life we preach—and follow—is better than that produced in Russia.

We are not sure that the truce will help us in that battle.

PURITY The Dalles has been cleaned up. A message and an order from on high has caused removal of the slot machines, the poker games and the girls who made the nights memorable.

It is not the first time The Dalles has undergone a purification. Many, many times since the days the first citizens found means to obtain the payroll money from the soldiers stationed there, there has been purges of well known iniquity.

The Dalles has been cleaned up. A message and an order from on high has caused removal of the slot machines, the poker games and the girls who made the nights memorable.

It is not the first time The Dalles has undergone a purification.

By almost any method of reckoning Sherman county has been lucky about fire in recent years.

Some credit certainly is due to a citizenry willing to fight fires and some to equipment which is generally scorned but consistently used.

Except for the Moro elevator no major fires have gotten away for many years.

How long the luck of the county can continue is unknown to everyone and certainly it is dangerous to depend on luck forever.

When the north bank was a building and the Deschutes branches were going in the police used to pick up wagon loads of empty pocketed workers who had been rolled and discarded.

The Dalles, for all its economic opposition thereto, has been a sort of center for men who labored at the agricultural and building arts and sciences for long and arduous hours without ceasing.

It is proper that there should be a purge of sin and probably natural that it should be done as fast and furious as was the sinning.

Morally The Dalles has come a long way since the era of 32 saloons and its similar plenitude of other places of sin.

A life of crime is getting less attractive all the time. Nowadays a thief seldom gets as much money as he could have earned in the time it takes to hold a victim.

It is funny how many people suffer from the bad habits we do not enjoy.

It is therefore, we think, safe to predict that The Dalles most recent tour to the mourner's bench will be of short duration and of little more lasting effect than its occasional jags on the less moral side.

Forty years ago each farmer had a header and two or three header boxes which were light, flared boxes with the right side low so that the header spout could discharge the grain into it.

Forty years ago each farmer had a header and two or three header boxes which were light, flared boxes with the right side low so that the header spout could discharge the grain into it.
